We spend 80–90% of our time indoors

Westminster clean air for homes

Wouldn't you like to learn more about the air quality in your home?

City of Westminster

Westminster City Council and University College London are running a study to find out what the air quality is like inside homes across Westminster and what can be done to improve it. As part of this study, we are looking for Westminster residents who would like to have a free indoor air quality sensor installed in their home for up to 4 weeks.

As a participant, you'll learn about the impacts of poor indoor air quality and what you can do to improve it. Improving indoor air quality could benefit your health.

You'll be participating in valuable research that helps your community. Plus, you'll receive a **£50 voucher** for your participation.

If you'd like to sign up to be considered for a sensor, visit: **www.westminster.gov.uk/indoor-air-quality-study** or email us at **airquality@westminster.gov.uk**

Alternatively, fill in your details below and post to us at the address below:
