### PROJECT DESCRIPTION

Approximately 2,180 Linear Feet of water mains ranging from 10 to 12 inches in diameter will be replaced and upgraded. The project area and the streets impacted by this project are shown on the map below.

### BENEFITS TO THE COMMUNITY

The Heights\_2\_8 project will improve the City of Tampa's water distribution system by replacing the existing water mains and increasing the capacity of the system. This project will replace the aging water mains in this area with new and larger diameter pipes, improving water pressure and water quality while reducing the number of service interruptions that might have been caused by main breaks or leakage. It will also increase capacity to serve a growing population.
