Dear Resident,

With the brighter weather continuing and spring now in full swing, works on site have progressed steadily over the past month as we continue the build of three new quality homes for Haringey Council. Residents will have noticed significant visible changes across the development, with the building continuing to rise and key structural elements now clearly taking shape.

A major milestone was achieved with the successful installation of the second floor structure, which was completed smoothly and keeps the build programme firmly on track. In addition, the new bin store structure has now been completed, helping to further define the layout of the site and supporting the wider infrastructure works.

Looking ahead, another exciting stage is underway this week with the installation of the roof trusses. This marks an important step towards completing the building envelope and bringing the overall form of the development fully into view.

Site working hours Monday to Friday 8am to 1pm, and if required Saturday 8am to 1pm.

We would like to thank residents for their continued patience and understanding while works progress. Construction will now continue up to second floor level, and we remain committed to keeping the community informed with regular updates as the development moves forward.

If you have any queries whatsoever regarding the works or the site, please do not hesitate to contact Vasyl. Alternatively, you can contact our Resident Liaison Officer, Nicola McCalla, on 01268 711117.

Finally, we would like to remind residents that building sites can be dangerous places. We kindly ask for your cooperation in reminding any children in your care of the dangers of playing around construction sites and the importance of keeping well away at all times.
