Dear Resident,

We're pleased to share that works on site are progressing well. As you may have noticed, the base for the new sub-station—designed to supply electricity to the Brunel Walk development—has now been installed see location in above & below images. The sub-station housing is scheduled for installation next month.

To support this, underground mains electrical services will be routed from Kirkton Road, through the new development at Brunel Walk, and along the community garden to the sub-station.

These works are planned to begin the week commencing 8th September. As the route passes through an enclosed community garden, we expect minimal disruption. For safety, we'll be installing Heras fencing (marked by the red line in the below image -03) to clearly cordon off the working area.

We appreciate your understanding and apologise for any inconvenience caused.
