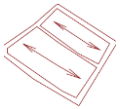

MAP 2 – DRAFT TOCKINGTON CONSERVATION AREA: PRESERVATION & ENHANCEMENT STRATEGY

Encourage appropriate management, protection and enhancement of the following characteristics and features of the Conservation Area and their settings

Key map 2

 Conservation Area boundary

 Important view

 Area of mapped ridge and furrow

 Woodland planting

 Area of parking congestion

 Locally listed building

 Listed building

 Public right of way

 Rhine/water course

 Stone boundary wall

MAP 2 – DRAFT TOCKINGTON CONSERVATION AREA: PRESERVATION & ENHANCEMENT STRATEGY

Encourage appropriate management, protection and enhancement of the following characteristics and features of the Conservation Area and their settings:

Seek to protect important views and vistas, within, towards and from the Conservation Area, which contribute to the character, appearance or setting of the Conservation Area and the setting of designated heritage assets. For further information about the importance of views to the Conservation Area, refer to chapter 6 of the CAA&MP.

Encourage the retention, maintenance and, where necessary, repair of buildings, structures and features that make a positive contribution to the character or appearance of the Conservation Area.

Seek to preserve and enhance the green, undeveloped spaces including woodland, greens, fields and gardens that contribute positively to the Conservation Area, including an appreciation of the historic settlement form and/or its landscape setting.

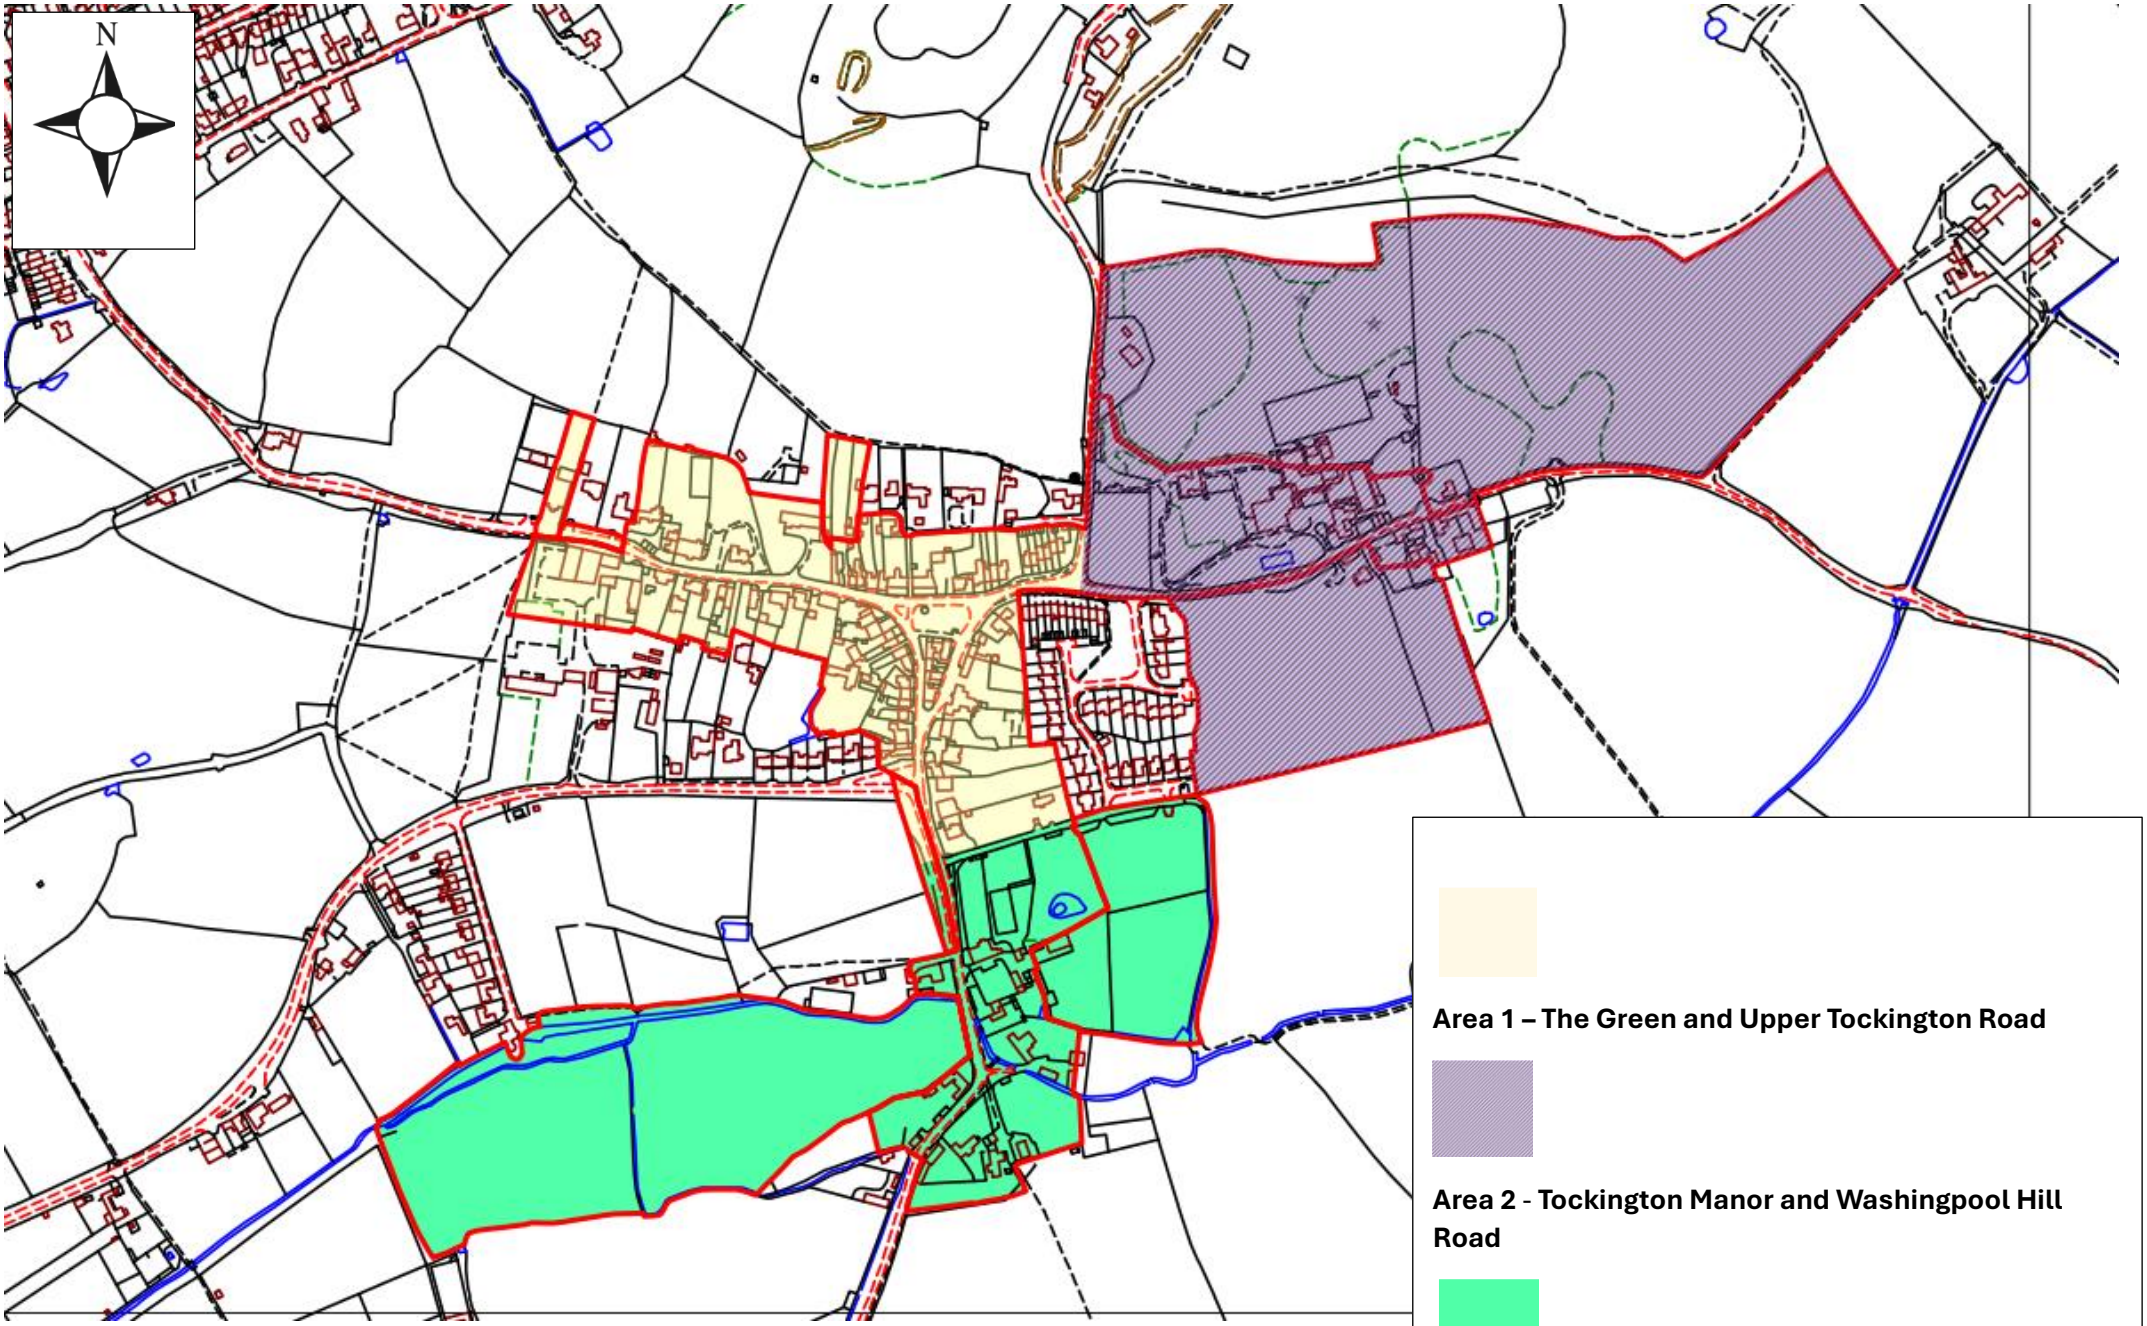

Ensure traffic management measures, street furniture and highway works are appropriate and sensitive to the historic character. Encourage sensitive measures to overcome the impact of parking on the grass verges.

Seek to ensure that local Green Infrastructure assets including public open spaces and commons, fields, public rights of way, rhines, woodland, trees, orchards, hedgerows, verges etc are planned, managed and enhanced in a way that maintains and enhances the character and significance of the Conservation Area and its setting and for their contribution to wider community and environment well-being.

Seek to maintain traditional stone boundary walls and the traditional rural character and sense of enclosure they provide. Encourage their repair where necessary or construction of new walling to match where appropriate.

Seek to preserve areas of ridge and furrow which are of archaeological value and which contribute to the historic interest of the Conservation Area

The above, overarching Preservation and Enhancement strategies should be read in conjunction with the more detailed strategies set out on within the three character area chapters and Chapter 8 of the CAA&MP.
