St.Peters RC School

Community Engagement

The vision for St Peter's RC School is driven by an ambition to deliver an inclusive, accessible, and inspiring facility that will improve the quality of education for the children in the community.

Proposed Site Zoning

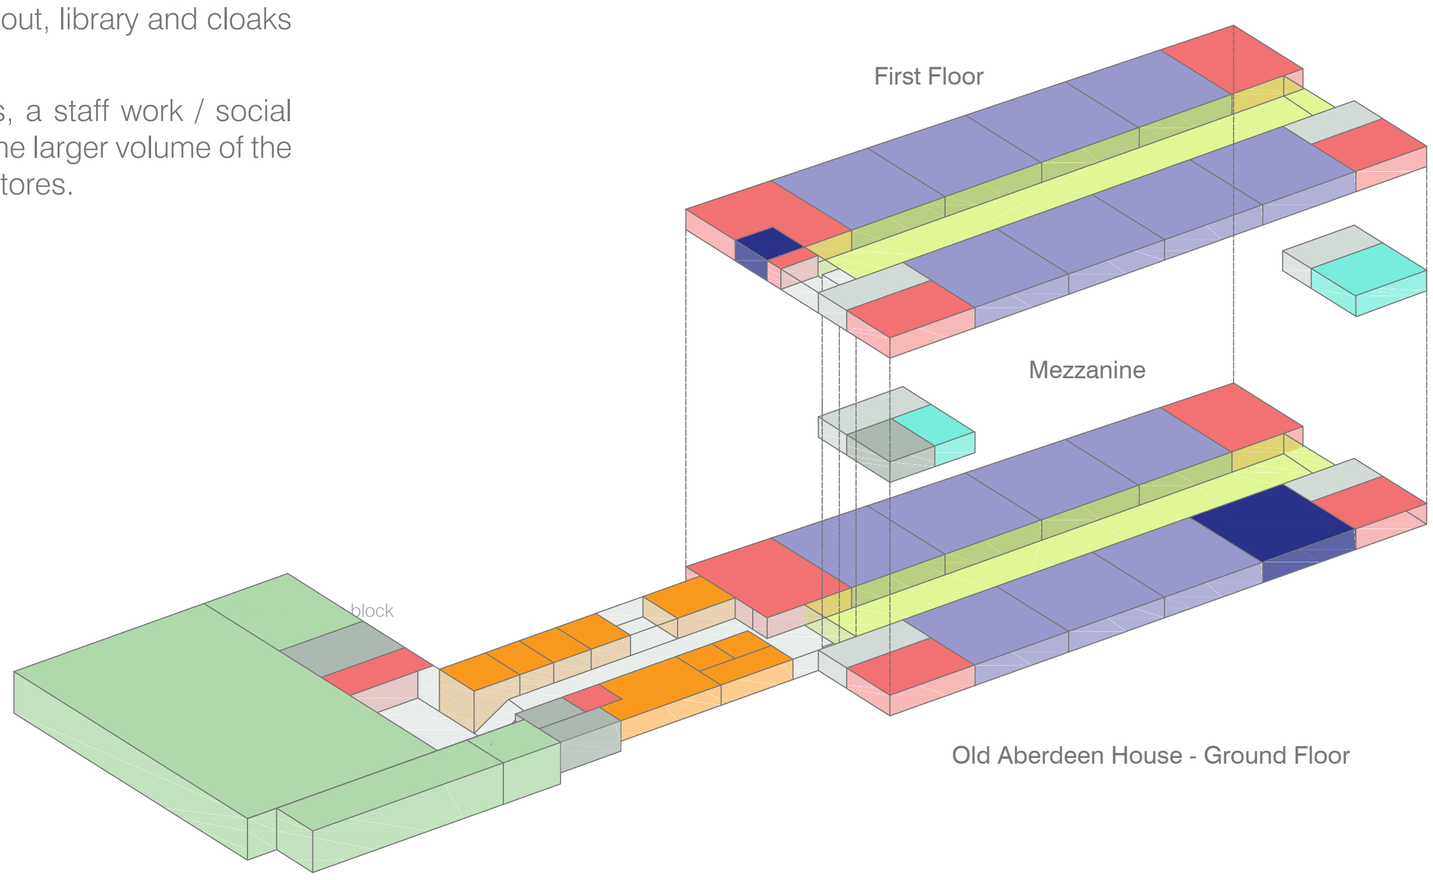

Spatial Arrangements

Old Aberdeen House contains the 14 classrooms required for a 2 stream primary school. Pupil toilets, a nurture room, GP room and quiet room are also accommodated. The wide central circulation space between the classrooms will house activity spaces and cloaks on the ground floor for the younger pupils and breakout, library and cloaks on the upper floor for the older pupils.

The new extension houses the admin spaces, including offices, a staff work / social room and meeting room and a new main entrance. This links to the larger volume of the dining and games hall which are supported by the kitchen and stores.
