Dear Local Resident,

With summer now in full swing, works on site have continued to progress well throughout the past month, with several key milestones achieved across the development.

As you may recall we are building three new council homes on behalf of Haringey Council.

Residents will have noticed significant changes to the building as the project continues to move forward. Following the completion of the roof structure, the installation of the windows and external doors has now been completed, allowing the building to become substantially weather-tight. As a result, the scaffolding is now being progressively dismantled, revealing the building's external appearance for the first time.

Internally, excellent progress has also been made. Floor screeds have been laid throughout the building, while the internal partition walls are now in place, defining the layout of the internal spaces. Mechanical and electrical first fix installations continue to progress well across all areas of the building.

Over the coming weeks, works will focus on completing the removal of the remaining scaffolding, progressing mechanical and electrical installations, and commencing further internal fit-out works.

Site working hours are Monday to Friday 8am to 1pm, and if required Saturday 8am to 1pm.

We would like to thank residents for their continued patience and understanding while works progress. We remain committed to keeping the community informed with regular updates as the development moves forward.

If you have any queries whatsoever regarding the works or the site, please do not hesitate to contact Vasyl. Alternatively, you can contact our Resident Liaison Officer, Nicola McCalla, on 01268 711117.

Finally, we would like to remind residents that building sites can be dangerous places. We kindly ask for your cooperation in reminding any children in your care of the dangers of playing on construction sites and the importance of keeping well away at all times.

24 Hour Emergency

In the event of an out of hours emergency or if you spot something untoward on site, please telephone 01268 436449 and you will be diverted to a team member who will be able to assist.
