

CATFORD STATIONS AREA IMPROVEMENT PROJECT

Public Consultations on Emerging Designs

MAY 2021

SITE PLAN

— Project Boundary

- **Lewisham Councils Vision** is for Catford to be one of the greenest town centres in London.
- Creating riverside access with two new river decks and planting will help residents to get closer to nature.
- By 2022, arriving in Catford by train will be a cheerful experience with greenery, planting and well-defined routes to walk and cycle into the town centre and beyond.

CATFORD STATIONS FUNDING

**The proposals will be delivered
through Section 106 funds associated
with the neighbouring Catford Green
development**

CONSULTATIONS

WHO WE'VE BEEN SPEAKING TO...

Transport for London	Barratt Homes	Lewisham Highways	Network Rail
Lewisham Planning	Thames Water	South Eastern Railway	Environment Agency
Arch & Co			

DESIGN ASPIRATIONS

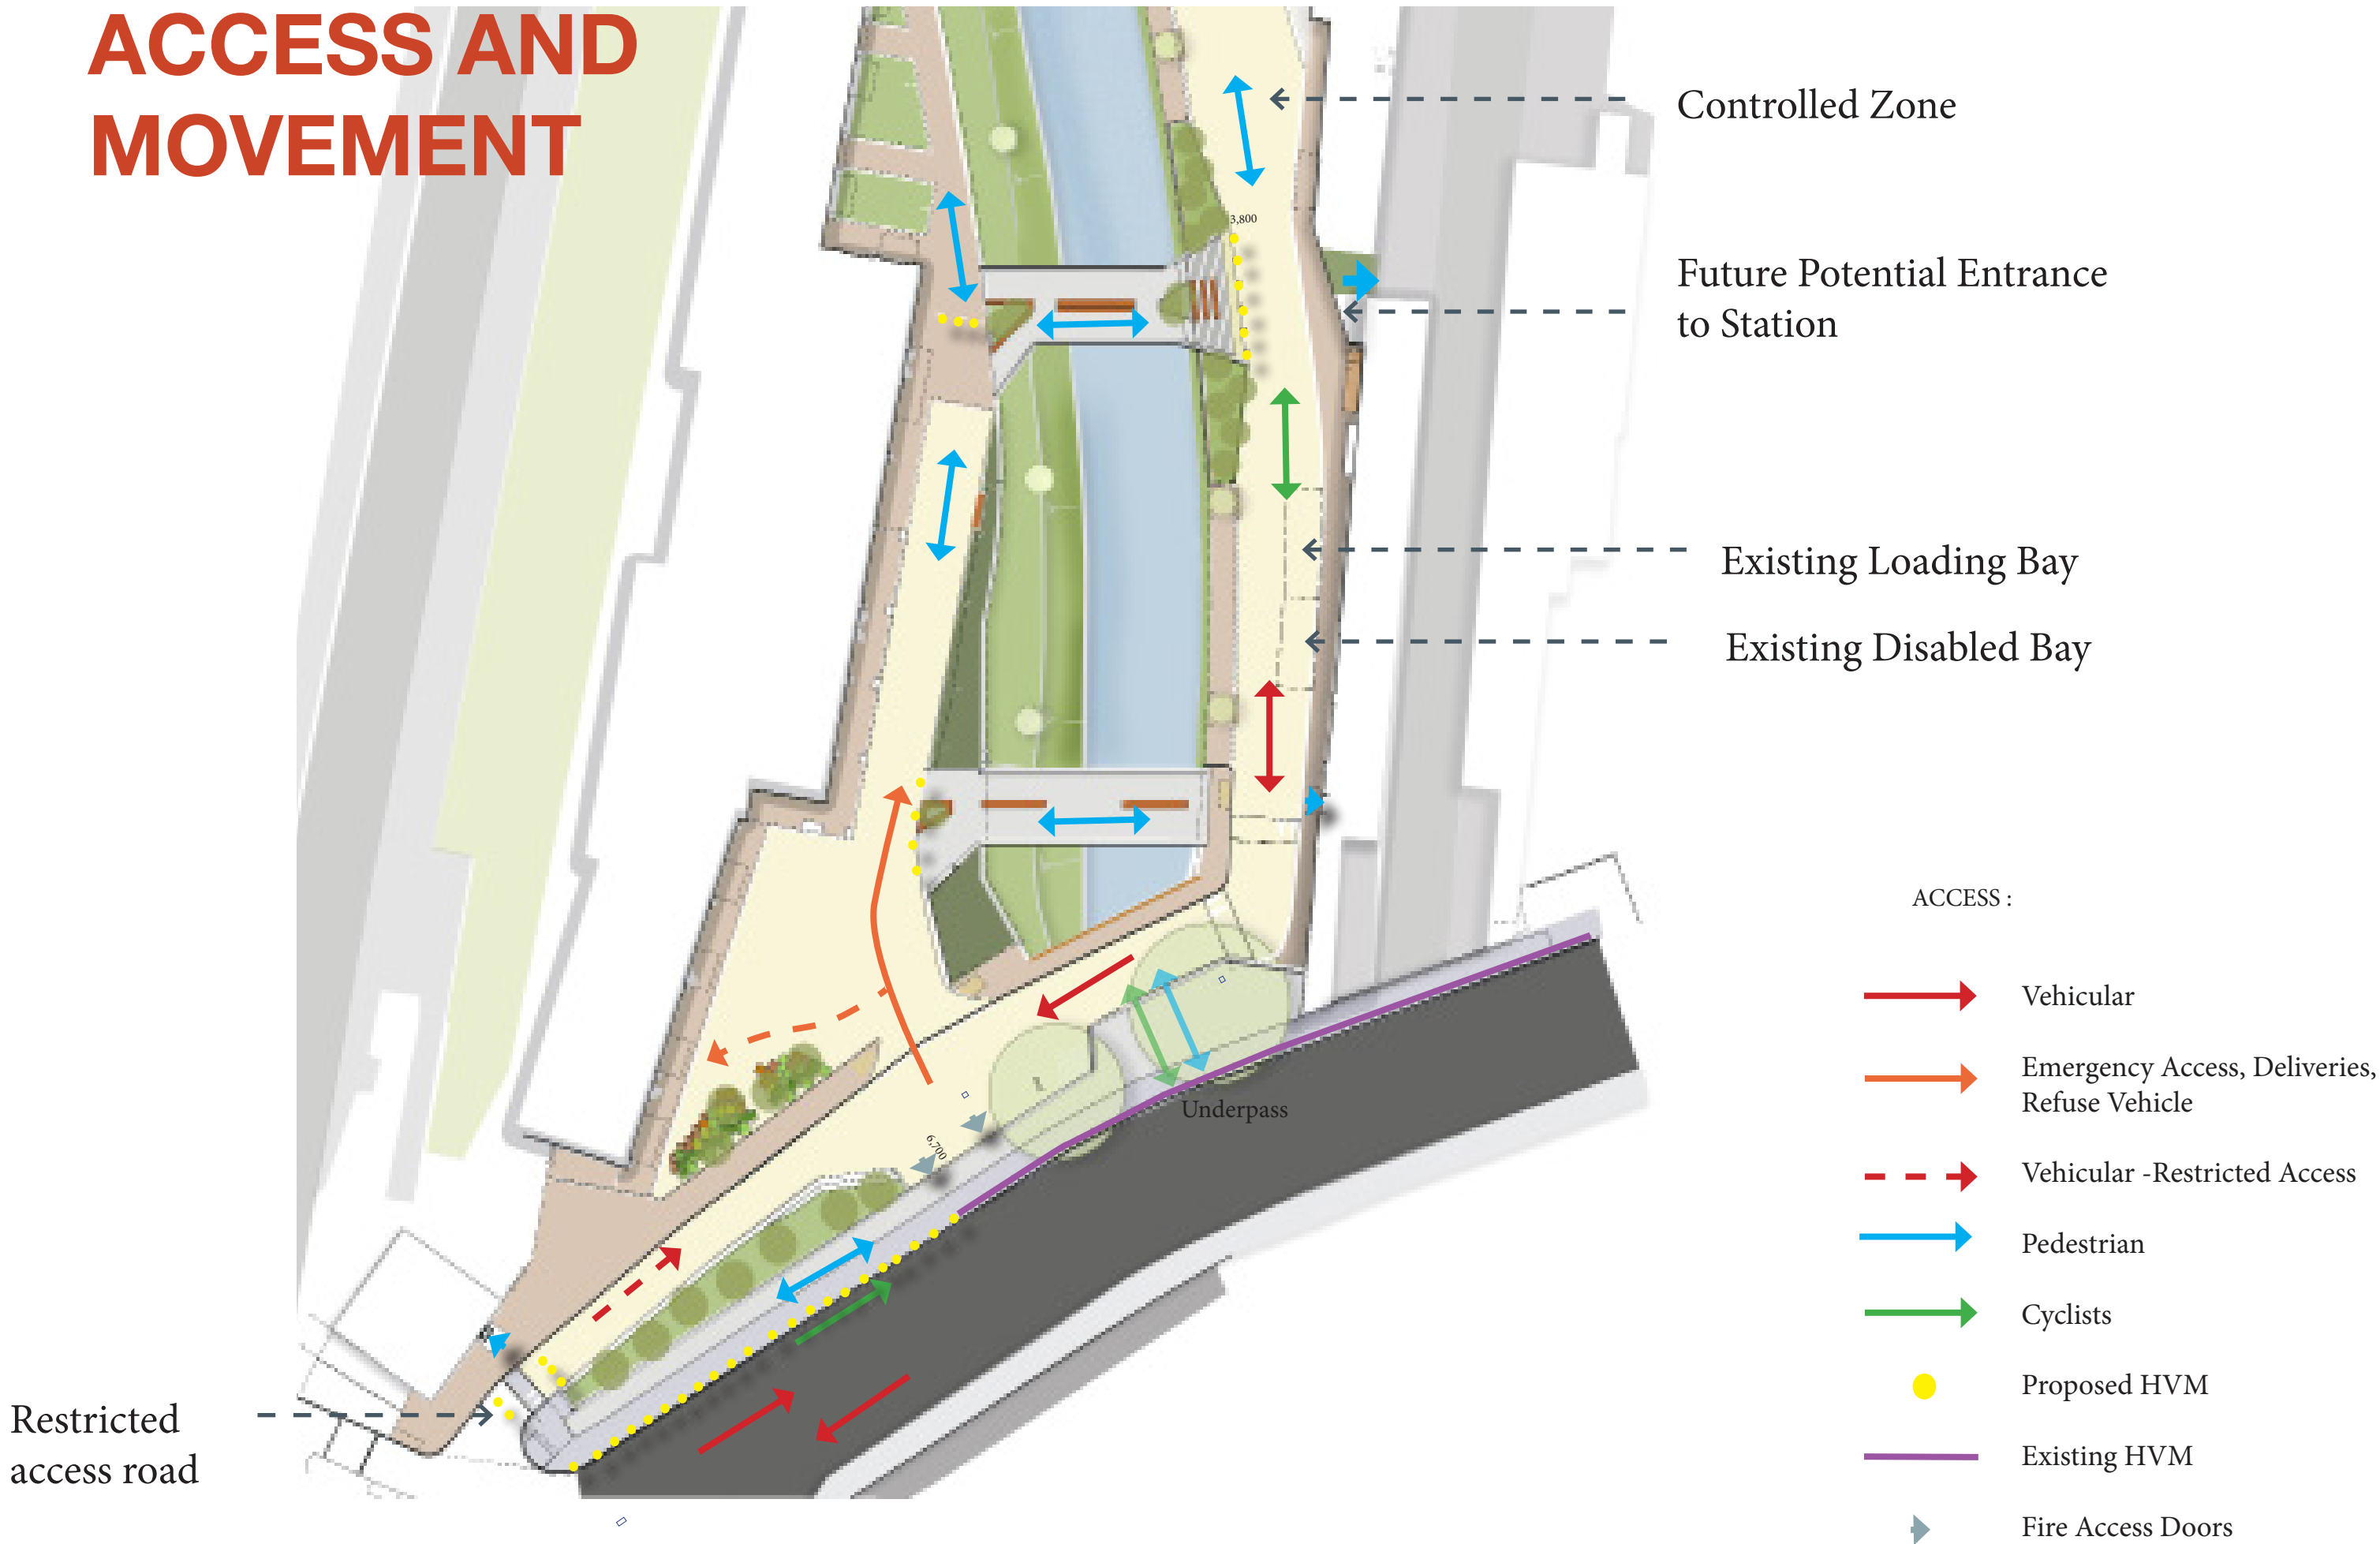

1. Footway widening- providing double width pavement for walking and creating better connection from the station to the town centre
2. Widening and enhancement of the underpass- will help strengthen the existing pedestrian cycle route beneath the south circular road. The improved underpass will link to a site that could come into development in the future.
3. Viewing platform- creating more space for people and enabling views to the river.
4. Creating opportunities for greening and seating
5. Reducing the road width to promote walking and cycling through Catford to reduce the use of cars and pollution
6. Creating riverside access with two new river decks and planting will help residents to get closer to nature.
7. Increasing greening and seating opportunities
8. Additional cycle storage planned around the station

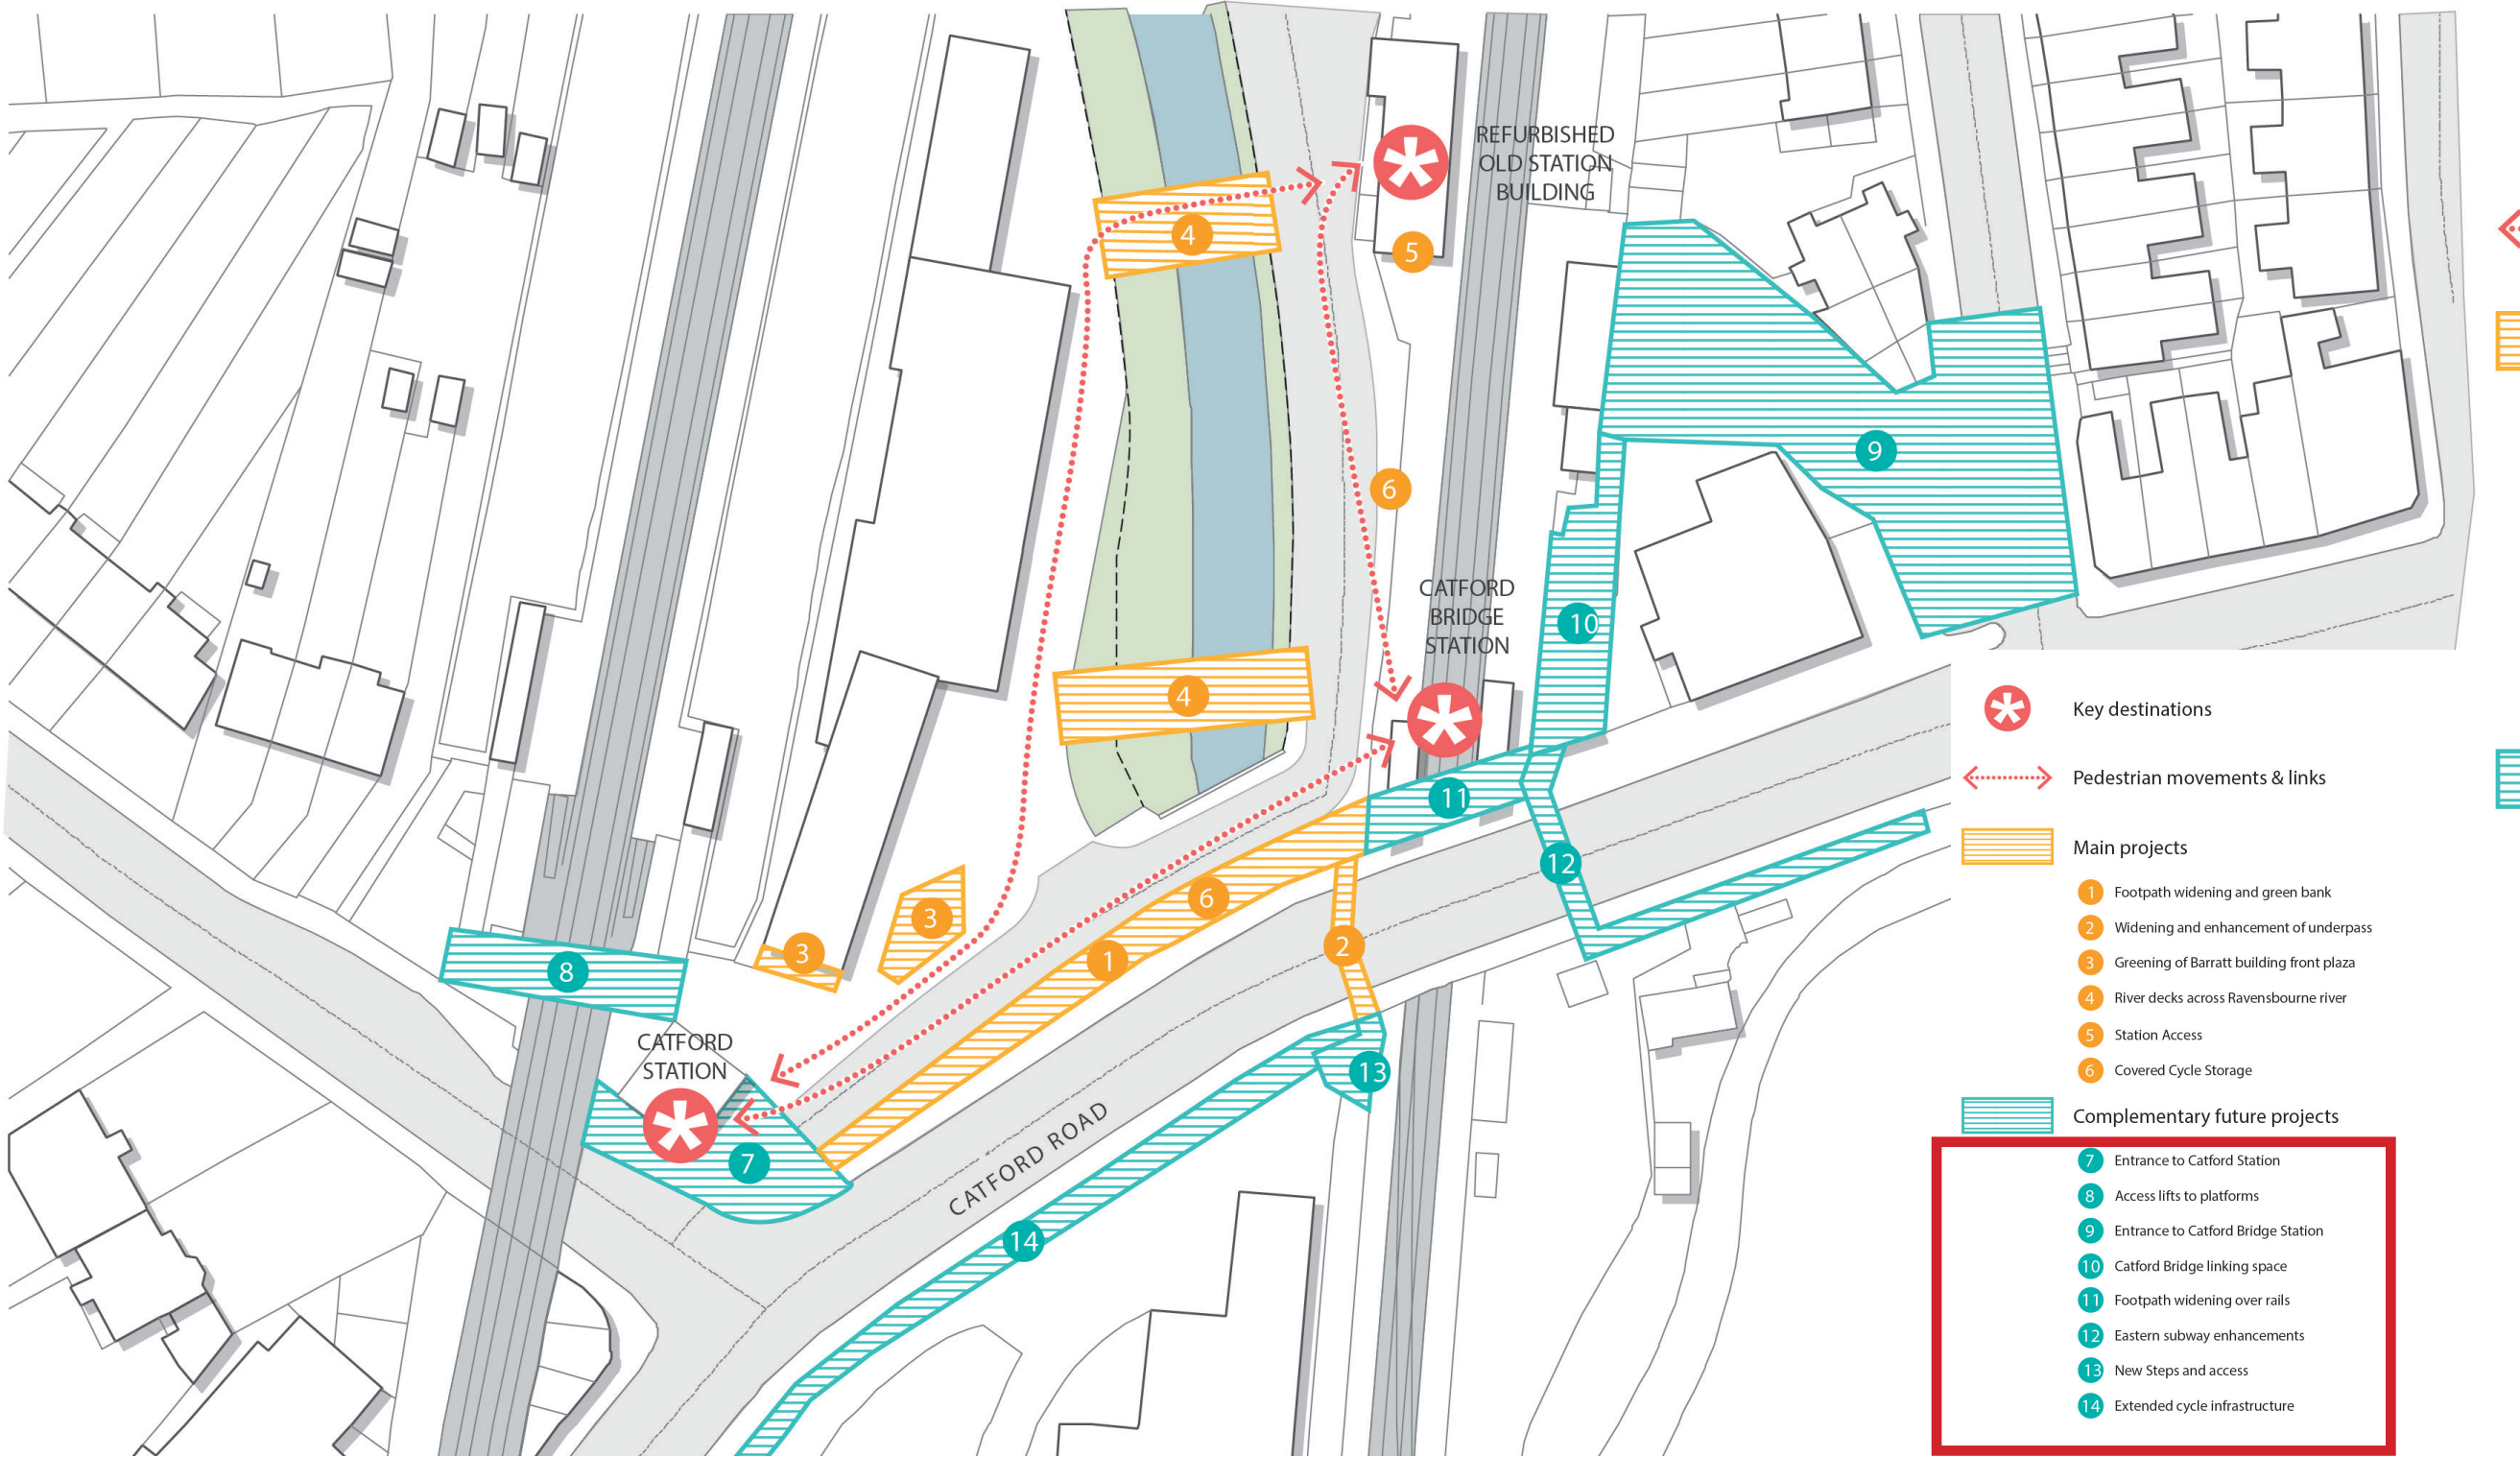

ACCESS AND MOVEMENT

IT'S ALL CONNECTED

Complementary Future Projects

RIVER DECKS

3D View

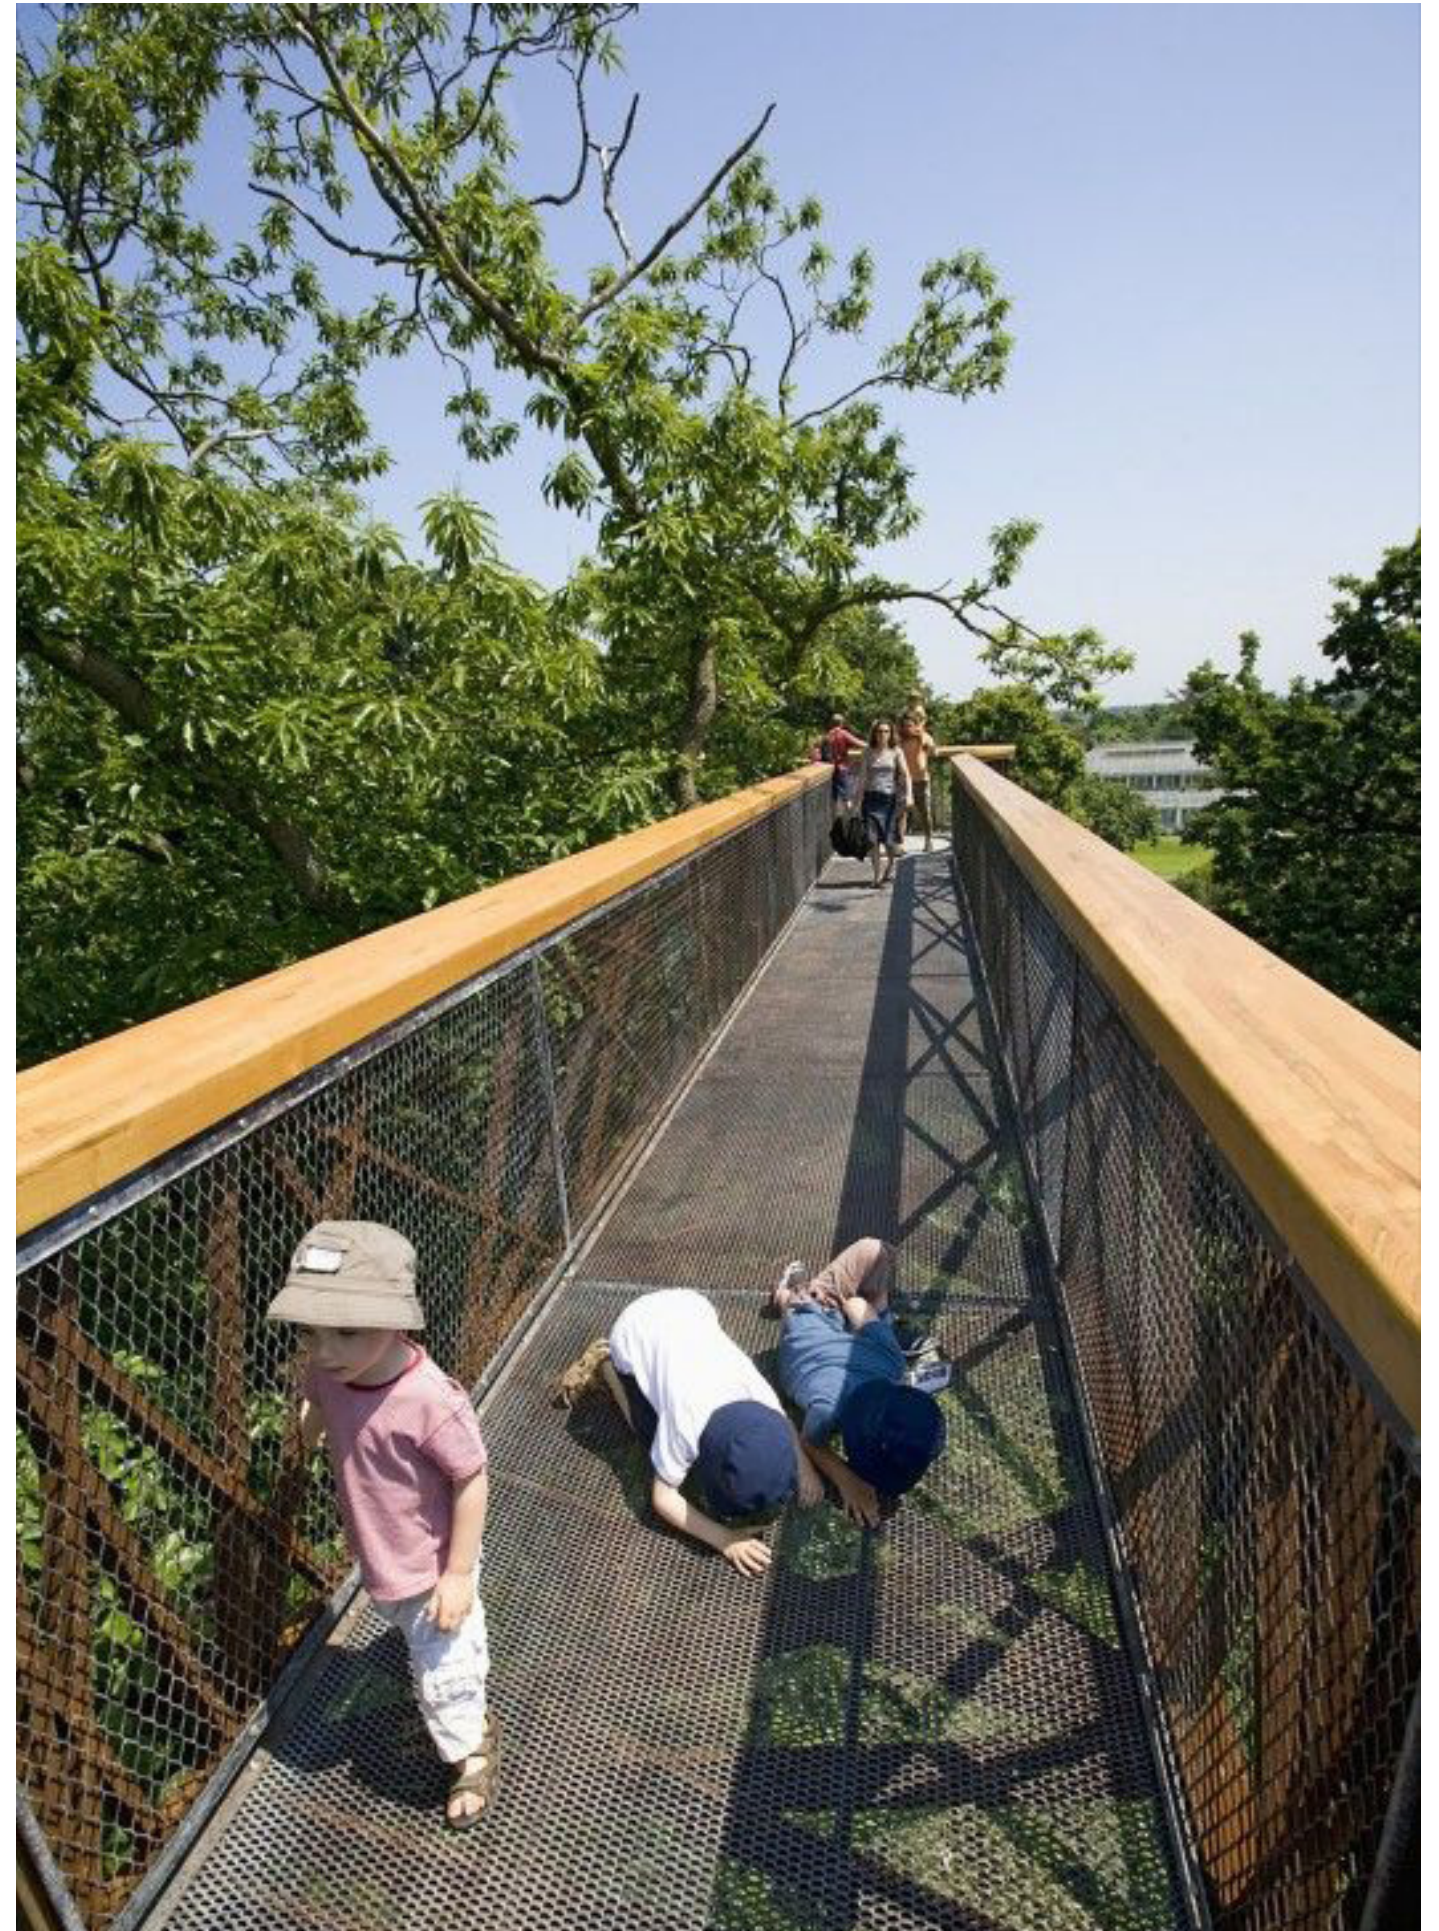

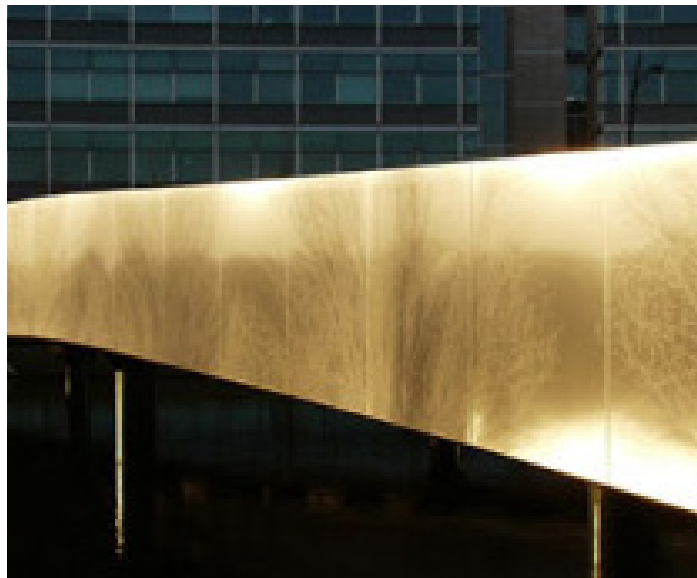

Plan View

North Deck

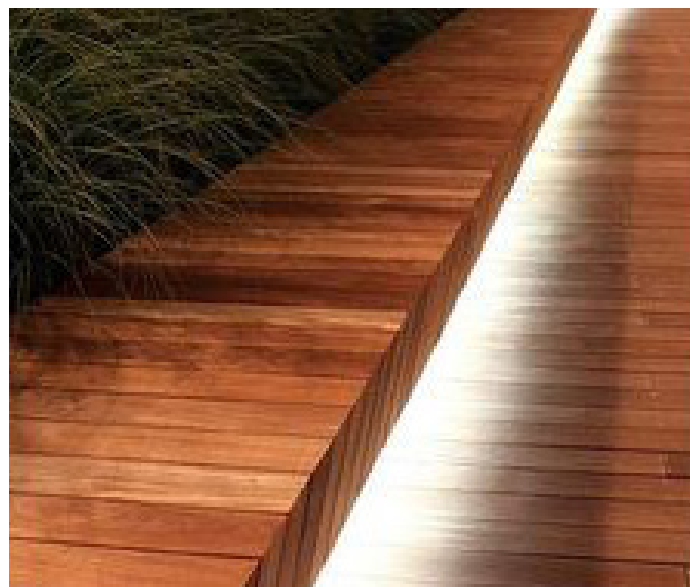

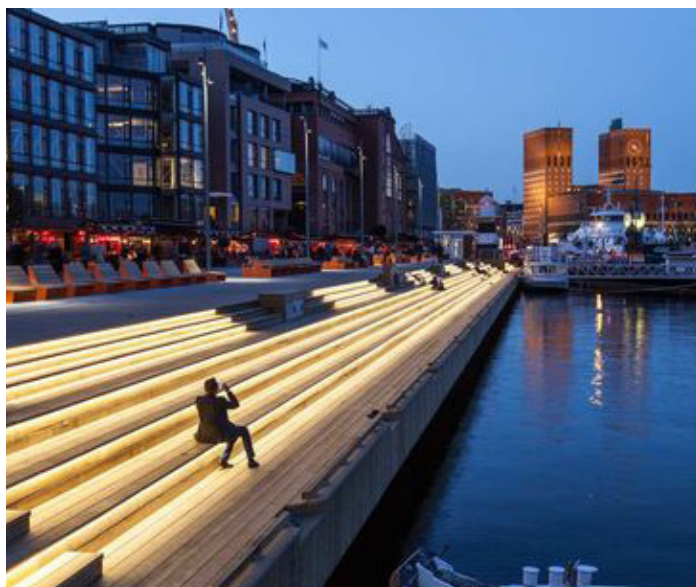

RAILINGS

- Creating connections to the river
- Allowing light penetration to the water
- Becoming an identifiable meeting point for the community

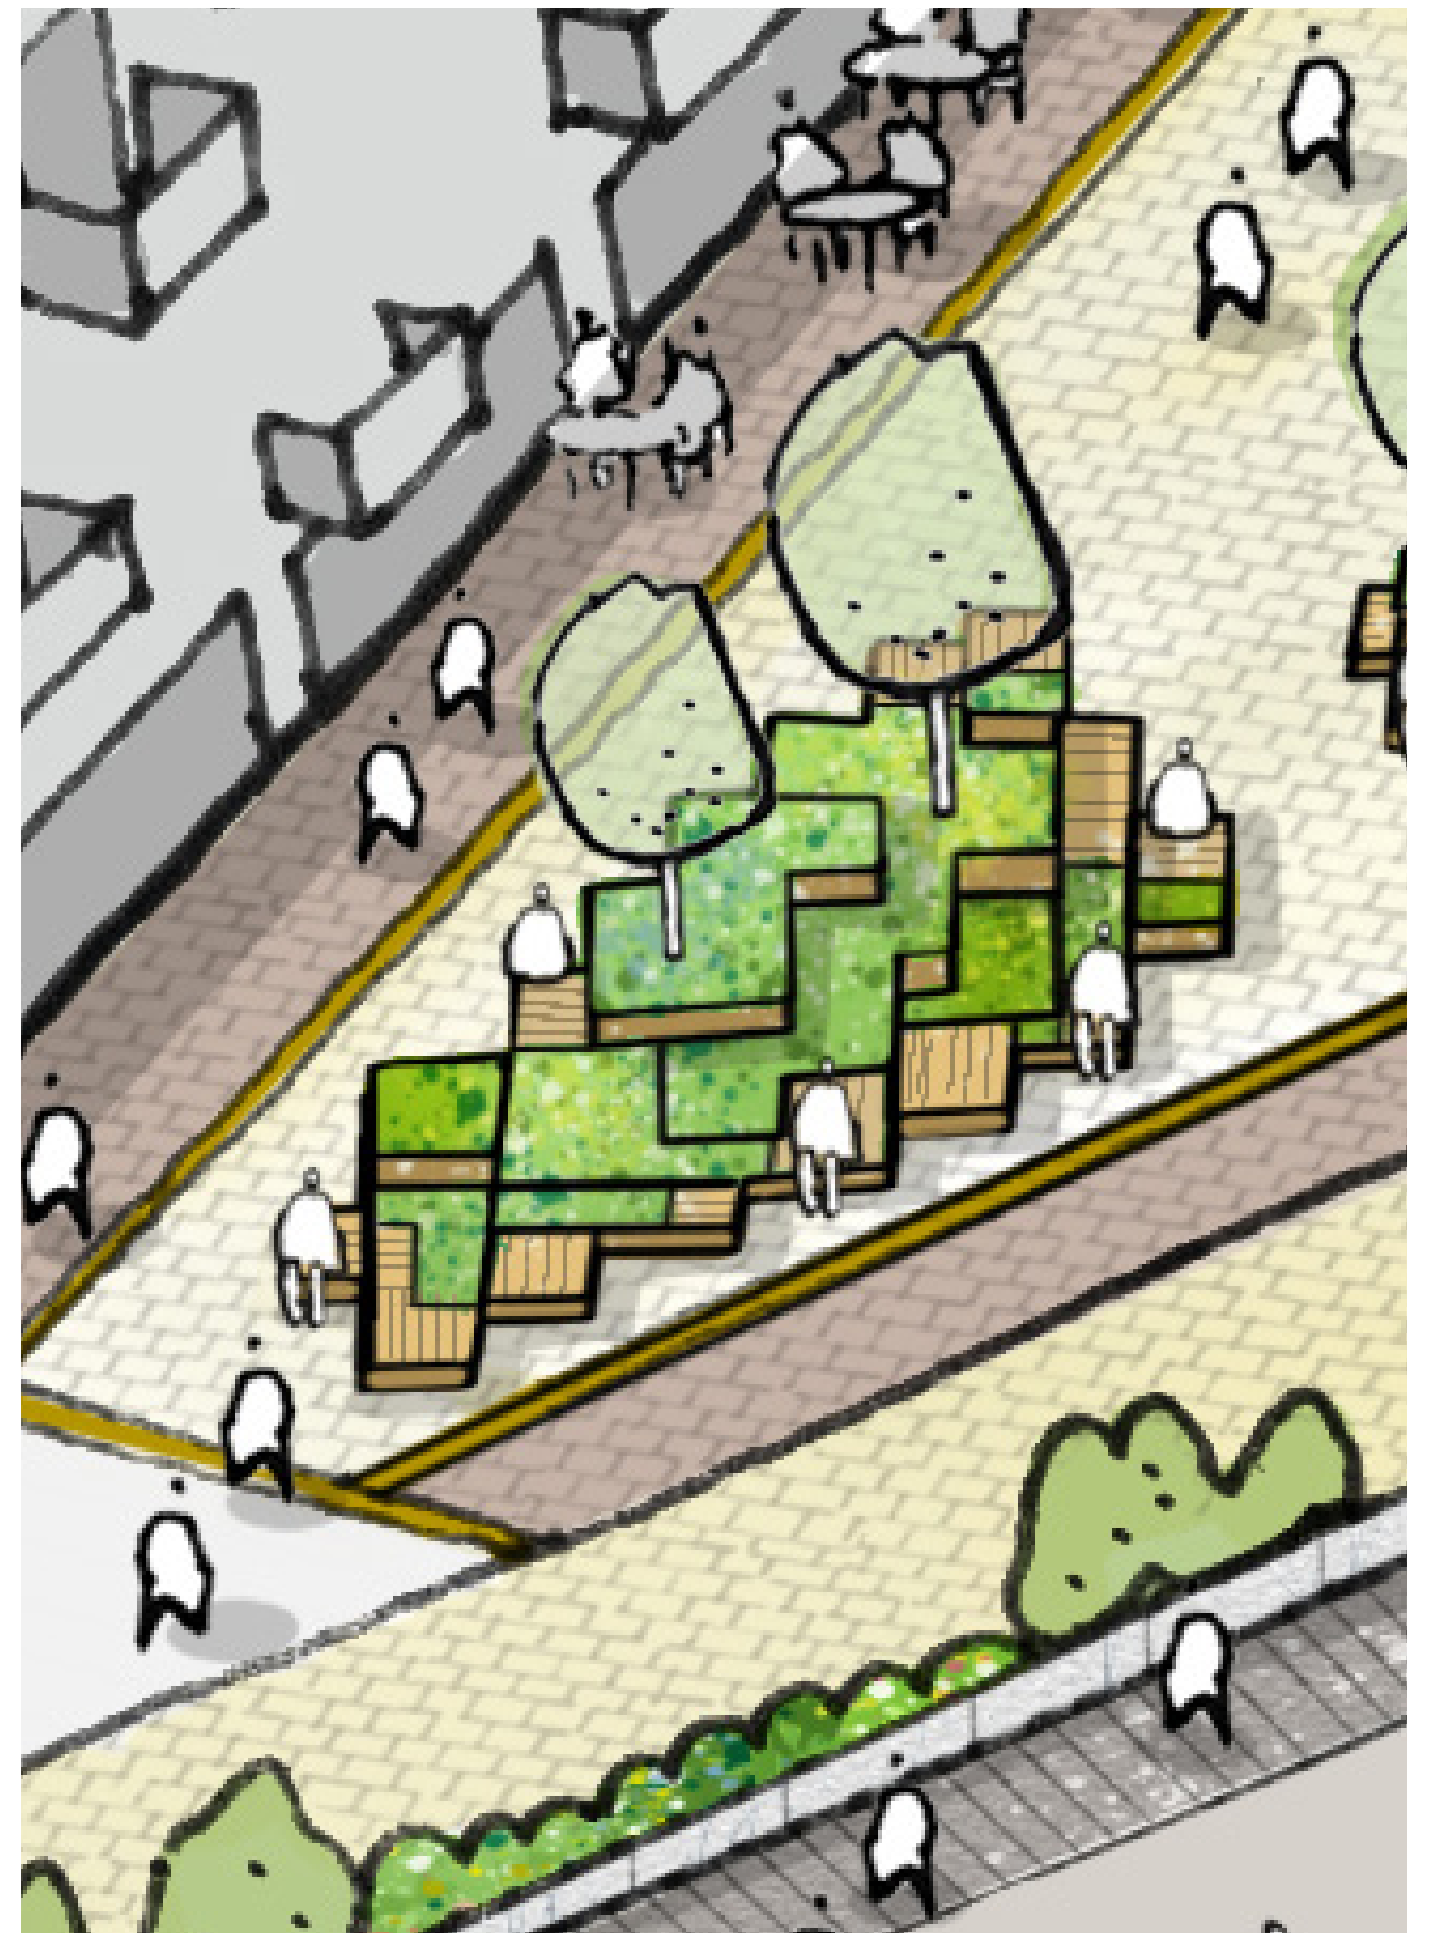

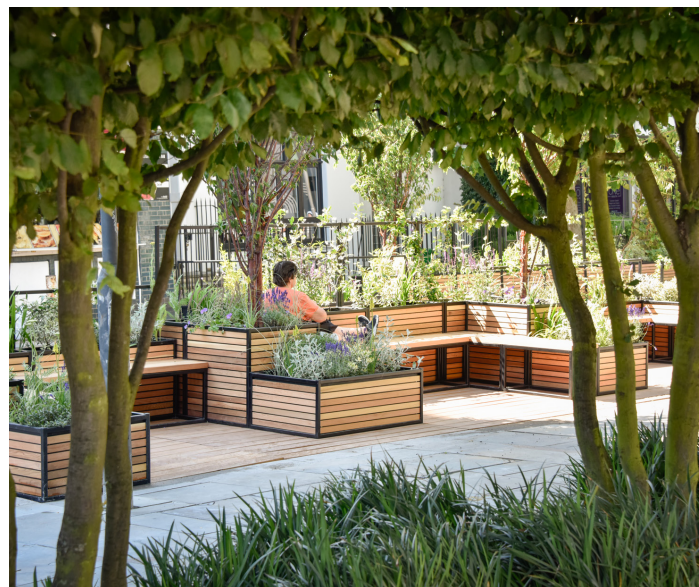

LIGHTING

- Feature lighting illuminates site increasing safety
- Lighting in railings create a distinct and memorable local identity
- Careful selection to protect nature
- Looking at existing lighting features

SEATING

- Replicated in variations across the site
- Playful and functional creating a distinct character
- Supporting arm and backrest
- Integrating planting

GREENING

- Supporting local biodiversity
- Existing trees are protected for future generations
- Opportunity for local groups to maintain select planting

A CYCLE FRIENDLY APPROACH

Proposed secure or covered cycle storage

Shared surface road to increase safety for cyclists-to be considered

Cycle stands to be integrated within parklet

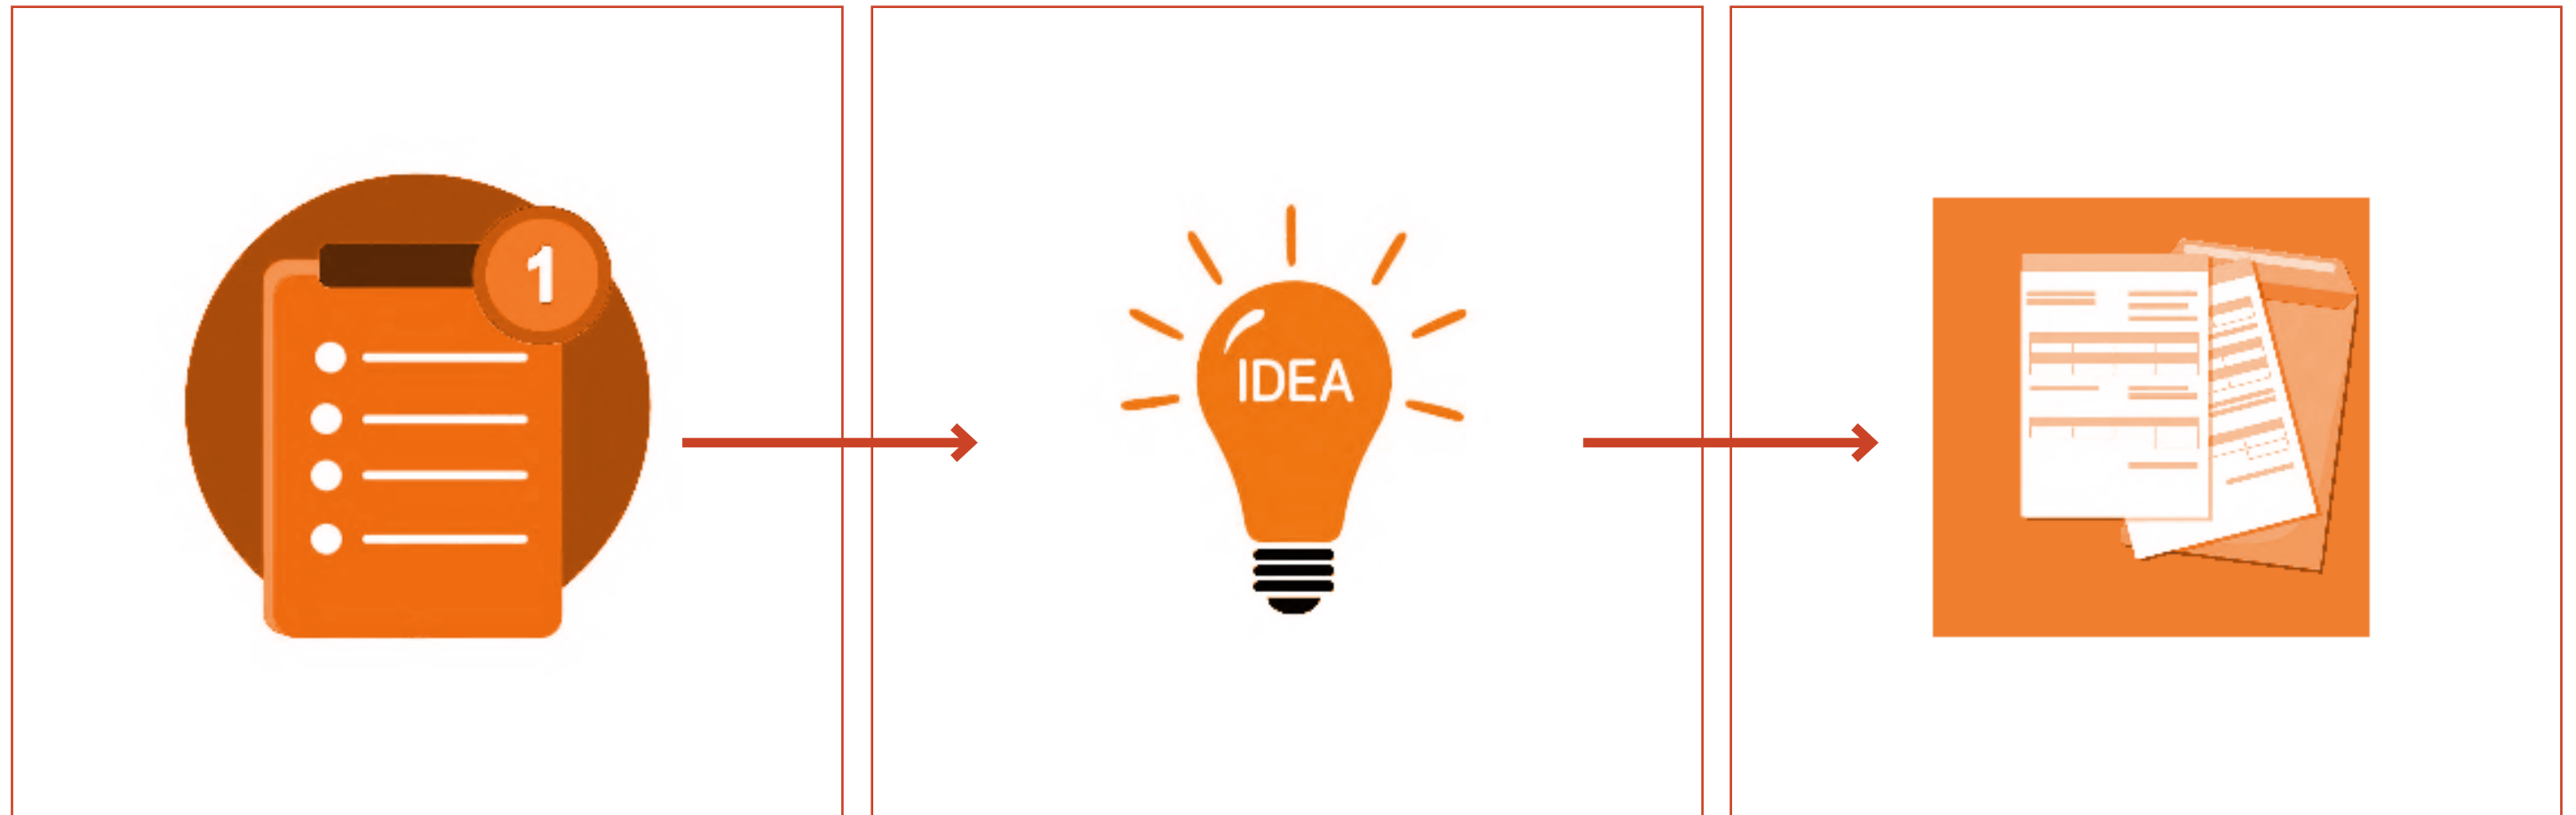

Potential Cycle stands to be integrated within new planting

A CYCLE FRIENDLY APPROACH

- Increased space for cyclists to move throughout the site
- Provision of secure cycle parking, sheltered bike parking and bike stands
- Supporting cleaner sustainable transport

Or join one of our free virtual consultations and socially distanced walkabout sessions on the 25th, 26th and 27th. Email to book a place at: catfordstations@bdp.com

WHAT ARE WE PROPOSING ?

BDP is working with London Borough of Lewisham to deliver improvements to the stations area which will include a double-width pavement along Catford Road between Catford Bridge and Catford stations, a wider underpass beneath the South Circular Road and two broad river decks creating a pleasant place to pause and meet outside the stations with enhanced planting and seating and increased cycle parking.

WHO ARE WE SPEAKING TO ?

BDP and the Catford Regeneration team, are currently working with: Transport For London to seek approval for works to the extended footpath. Network Rail to seek future opportunities for a new platform entrance. The Environment Agency to obtain approval for decks over the river. The team have also been collaborating with other stakeholders including South Eastern Railway, Barratt Homes, Thames Water and Arch & Co.
