Dear Local Resident,

As you may be aware we are building 3 new council homes on behalf of Haringey Council. Residents will have noticed lots of work externally over the last period. Thames Water have now completed the installation of the new water main through the estate and up to the new properties. We apologise for the disruption which was caused to all residents whilst Thames Water undertook their works. We are waiting for a confirmed date from UK Power Networks to install the new electricity main and will advise all residents of this once confirmed.

Good progress continues internally, with plastering works now complete and kitchens and bathrooms due to be installed over the coming weeks. These works represent another significant step towards the internal completion of the development.

We would like to thank residents for their continued patience and understanding while works progress. We remain committed to keeping the community informed with regular updates as the development moves forward.

If you have any queries whatsoever regarding the works or the site, please do not hesitate to contact Vasyl. Alternatively, you can contact our Resident Liaison Officer, Nicola McCalla, on 01268 711117.

Finally, we would like to remind residents that building sites can be dangerous places. We kindly ask for your cooperation in reminding any children in your care of the dangers of playing on construction sites and the importance of keeping well away at all times.

24 Hour Emergency

In the event of an out of hours emergency or if you spot something untoward on site, please telephone 01268 436449 and you will be diverted to a team member who will be able to assist.
