

Project Updates

Our goal is to keep service interruptions at a minimum. If there are any service interruptions affecting homes, customers will be notified ahead of time.

Customers will be notified if their service will be impacted. Residents are also encouraged to visit tampa.gov/EmpedradoStreetPIPES, for regular construction updates and to sign up for notifications.

Work Details

This project will replace aging water pipelines, some more than 80 years old, with new, larger water mains designed to improve system performance and reliability.

Benefits include:

- Improved water quality
- Increased water pressure
- Reduced risk of water main breaks

Construction crews will install the new water mains and connect all customer service lines to the upgraded system. After this work is complete, paving crews will restore and repave the roadway.

The project is expected to be completed by December 2026.

We recognize that construction may cause temporary disruptions in your neighborhood. We appreciate your support as we work to enhance your infrastructure and water service.
