

A25/A3100 Boxgrove Roundabout, Guildford – ATT3 Active Travel England Improvements

Statement of Reasons

It is proposed to implement a series of Active Travel improvement works on the A25/A3100 Boxgrove Roundabout in Guildford; elements of which require TROs.

The proposed improvement works comprise of re-modelling the existing roundabout in order to accommodate the introduction of new facilities that promote active travel modes of transportation (walking/cycling/scooting/etc).

New and improved shared use footways/cycleways are to be introduced around the outside of the re-modelled roundabout, with new raised parallel crossings (that require TROs) introduced across all four arms of the roundabout to provide pedestrians and cyclists with controlled and prioritised crossing facilities.
