TO: The Owner of _____
DATE: February 22, 2022
FROM: Town of Nantucket c/o Weston & Sampson Engineers, Inc.
PHONE: 508-228-7200 x7801

In the Spring/Fall of 2022 a Town sewer line will be installed in your street and a service connection will be run from the main sewer line to the edge of the roadway facing your property. The Town desires, where possible, to accommodate the property owners in the project area by locating the service connections where best suited to connect their domestic wastewater (toilets, sinks, showers, laundry, dishwashers, etc.) to the new sewer. Where multiple dwellings exist on one property, each dwelling will generally be provided with a separate connection.

You may request assistance in determining the location for your service connection. Your plumber or local contractor can assist you in this matter, or you may contact the Town's engineering consultant for this project, Weston & Sampson Engineers, at PatnodeA@wseinc.com to arrange for an on-site appointment regarding your service connection(s).

Please fill out the form on the other side of this letter and include a sketch (in the space provided) of your dwelling's layout in relation to the street and the desired location of your service connection. The examples shown below are to be used as a guide, not as a choice. If you know the location(s) of your septic system leaching area, please also show them on your sketch. Please return the completed form in the self-addressed envelope provided with this mailing by March 7, 2022.

Our goal is to locate connections where most appropriate for property owners. However, if we receive no reply from you, your service location will be selected by the field engineer at the time of the main sewer installation. This location may not be the most advantageous for sewerage your property. Thank you for your assistance.

EXAMPLE LAYOUTS

Note: Diagrams depict a plan (overhead) view of house.
Dashed lines depict desired house connection layout.

SEWER SERVICE LOCATION FORM

(This is **NOT** your sewer application and permit)

The following general rules are provided to assist you in selecting the service location that best serves your property.

1. In general, sewer services will not be allowed to have more than two (2) angle points, or a total of 180-degree change in direction. Cleanouts (capped piping that is run to the surface for maintenance access) shall be installed at each change in direction.
2. Connections to existing building plumbing systems must be made upstream of any septic tanks or cesspools, as these facilities are to be abandoned, in most cases.
3. Stormwater, surface water, groundwater, roof water runoff, and/or submerged drainage shall not be discharged in any sanitary sewer.
4. Sewer services shall be located not less than ten (10) feet horizontally from any water service pipe. Exceptions can be made if the sewer service is below the water pipe by at least 18 inches.

House No. _____ Road/Drive/Way/Lane Property ID/Map & Parcel: _____

What is the height measured from the cellar floor to the top of the foundation (sill)? _____

How far from the top of the foundation (sill) is the bottom of the existing soil (waste) pipe?

_____ feet _____ inches

Second soil (waste) pipe (if applicable)? _____ feet _____ inches

Do you have wastewater facilities in your basement (e.g. washing machine, toilet, etc.)?

_____ Yes _____ No

Do you plan to install wastewater facilities in your basement? Yes ____ No ____ Unsure ____

Please indicate the position of your house to the surrounding street(s) and the desired location of your service connection. See the examples on the front of this form.
