Appendix 5

Q5 Are there any changes or proposals you think we should consider which might generate income?

Giving better rates to businesses and grants to start businesses. Having less fast food and chains to improve people's health and keep the economy local
You have introduced the LTN areas which has resulted in throwing traffic to the periphery roads. It is often difficult for traffic to exit onto those periphery roads from the LTNs. An example id Bruce Grove where continuously streaming traffic blocks easy access onto Bruce Grove from the LTN. The use of the yellow box system backed up by cameras would raise money for you in such circumstances Borough wide
A consideration of working more effectively with neighbouring boroughs with regards to the delivery of services !
Libraries bring added value to many aspects of community life, across the age range, supporting vulnerable people. There are too few freely accessible public spaces in Haringey. Libraries play a key role in terms of support and inclusion
Keeping libraries open is vital to the long term wellbeing of the community
Fine car drivers that idle engines in neighbourhoods. Fine old car drivers that are clearly polluting area with smoke.
Stop hiring people who do not live in London, let alone within the borough of Haringey. It's embarrassing.
Spend more on lawyers to protect budgets from dishonest contractors.
DON'T rent out more park space for private events - parks are for everyone. DO enforce fines for bulky rubbish dumping and introduce a good practice code for businesses about minimising packaging especially non-recyclable plastic.
Teach community about financial literacy and banking skills and opportunities. E.g. actuaries get upto £10,000 per month, developing such skills and knowledge will benefit the community who will have more to spend on their community
More taxes such as council tax, allotment sales, speed cameras for cars, harsher parking terms and more legitimate businesses in the High Road which generates business tax.
My response for 4: you'd charge for the food and drinks.
Continuation of renting out library rooms.
Open council car parks to public
Open up existing but mothballed housing stock and rent out rooms to single people.
Create a public nursery system where parents that have child and cannot work since they have to take care of them where they can drop them off for X hours. making them capable of working full time while contributing to the society instead of staying at home not producing nothing of value for society, this system could be potentially be offered at a reduced costs for families that are struggling, this will allow to reduce borough expending in housing benefits since these individuals would have an income to support themselves making it step by step easier to reduce the tax burden that other members of the borough have to pay. Create an auditing/monitoring system for people that claim that cannot work because they claim that they cannot find job and work together with council schemes and jobcenter to ensure that those people can actually get a job so they have no excuse but to stop living off the taxpayer.
N/A
Support smaller business
Ensuring that money is not spent on vanity projects. Have a look at https://www.mynottinghamnews.co.uk/budget2020/
outsource some services at the library that will allow the library to stay open for the community but with more modern facilities that service the remote working culture and community.
space rental within Hornsey Library for events
Renting empty spaces, guardianships etc.
see answer to Q3

Appendix 5

Q5 Are there any changes or proposals you think we should consider which might generate income?

No
Tax the rich
Higher parking charges
Where there are economic exchanges with private companies, increase the cost to them, e.g. for hiring spaces; sponsorship of events; advertising. Otherwise they are benefitting at the expense of local people
No
Raise council tax
Tax more cars that are polluting. Install more EV chargers and get a small tax on it?
Drinks facilities
Regenerate Wood Green Shopping centre with private investors to increase revenue and employment in the areaPos
Fee for using the library
This Q should not even be on here. The council grabs eye watering amounts from local residents that they waste criminally, to ask how you can grab more money to waste is sickening
Heavy fines for drivers flouting the LTNs and for petrol scooter on pavements. I'm always surprised Tottenham Town hall and Bruce Castle aren't made more of as wedding venues etc.
Actually implement the landlord liscencing proposal and ensure fines are levied on those not paying. Landlord abuse of tenants is rife and they have the means to address these problems and pay for the social damage bad landlords do. Increase second / empty homes levies. Tax chain companies an additional levy on high streets to help generate income and protect local shops
Better marketing of the rooms upstairs in the library. Why did the expensive renovation happen if then provision and access to the library is cut
see previous answer - the library has a top floor which can be rented out. it also sits in a cul de sac with a number of independent businesses who i'm sure could use the space to benefit themselves and the community.
None
See above
Use the upstairs of Haringey library to provide a community resource. Why not rent out rooms to be used by the community?
Increase parking charges
Allowing Better to take over Park Road Leisure Centre
Greater use of the theatre at Alexandra Palace would be popular in the west of the borough - could the council liaise in this project??
Offer some of the many council buildings and rooms for hire for local small businesses and artists.
a reasonable charge for events at library. smarten it up for events.
No
Let people name things for cash. I'd happily drive round the Tottenham Hotspur roundabout or walk through Downhills Park, sponsored by BT.
Look at resident demographics and look at what facilities you have. I see enough services (lessons etc) on offer in expensive rented spaces. Why not see if council spaces can be put to multi-use (I do realise that some do this already but possibly not enough..)
N/A
1. The above mentioned. 2. Room hire to community groups, training etc for profit. 3. Children parked when closed 4. Host auctions or board games tournaments

Appendix 5

Q5 Are there any changes or proposals you think we should consider which might generate income?

Since I still do not think after 40 years plus that you are maximising the commercial possibilities of Alexandra Palace commercially, I do not think Haringey Council decision makers have the experience in income generation.
Increased vigilance around littering, fly tipping and unhygienic waste disposal
See above
Without seeing your budget and what you currently charge for this is impossible to answer
Invest in young people and venues supporting them. Such as libraries
Keep building houses, make sure they are owner occupied.
Review spending on council projects and help those in need.
Don’t know enougj
Permit direct donations.
Improve Crouch End's high streets e.g. tree planting, cut-off car access to make it more appealing to shoppers, which would increase shop occupancy and increase business rents for the counsel.
Libraries
No
I do understand the use of Finsbury Park for concerts - I don't like it but I appreciate that it brings in money and is valuable to support services.
Have more festivals eg in Alexandra Palace
NA
Keep all libraries open to the public, closing on Sundays only. Unfettered access will allow opportunities for renting out upper rooms.s
No
Perhaps some rental from allowing community groups and clubs to meet in libraries and council buildings at an affordable rent ?
No
Reducing senior salaries and bonuses just for doing a job
Charge the Chinese more money for buying up all the property like the Hornsey town hall.
See 3 above
Already answered including parking charges.
see my answer to no 1. At Stroud Green and Harringay Library so many different groups of residents are served. From mothers with babies, toddlers, local special needs children and children visiting during school and after school.
As above
Sorry nothing further to add
As previously mentioned.
No
Yes, printing, scanning and binding services.
See above
Increase charges for second and larger cars in CPZs
Invest in the cultural life of the Borough, making Haringey a place people want to come to. I would suggest you look at Doughnut Economics Action Lab's work with local councils - this helps councils pursue a 'circular economy', thereby reducing waste and living within our boundaries in a way that is environmentally and socially sound. Look here: https://doughnuteconomics.org/themes/1
Family events
Improved soft play area to attract more parents/carers. Introduce donations for children singing sessions in the morning.

Appendix 5

Q5 Are there any changes or proposals you think we should consider which might generate income?

Hire out the library spaces effinceintly and make it clear when the space isnt abalaible to the public. Dont hire out the computer rooms- people need to sort their benefits out on those machines. Lease bits of libraries to coffee carts.
Yes by using the rooms for different purposes
Cut all councillors expenses by 15%
Charging for certain leisure services
charge households that have vehicle crossover to their drive/front garden and fine residents who leave their refuse bins on the pavement £5 per week
No
Consider in house home care with permanent staff instead of use of poor quality agencies with high cost agency staff. Cut use of agency staff in all areas and ensure full recruitment and employment.
No.
Floodlight on the lido would attract a he's group of paying swimmers from our borough and beyond
There is a newly renovated space in Stroud Green library that has never been marketed. It could generate an income if properly managed
enforcing laws like actually charing for littering and not picking up dog poo
Don't know
See Above
In general throughout Government the prices paid for the procurement of goods and services varies wildly, with Health Authorities within the NHS being seing some of the widest gaps. I would like to see far more collective cost analysis and procurement policy making between sections of Government. .
n/a
No
See previous response
You asked for tree sponsorship and then haven't responded
Not knowledgeable enough
Lease out more spaces for private events. Hot-desking in libraries with premium WiFi, coffee etc
No. the council generates income by robbing motorists which needs to stop.
Increase costs for on street parking. Those of us with a car are by definition privileged and can afford to pay more.
Increase rates for multinational companies- eg Starbucks.
Rent out units within council buildings
As above - monetising hte upstairs space at Harringay and Stroud Green library
Start fining the huge number of people misusing disabled badges
No
Could the Tottenham Stadium be leveraged - more events?
No comment
Do you, or could you, let out Council office buildings for other use when not occupied by the Council?
Consider hiring out community rooms, e.g. the ones above Stroud Green library, to groups such as the U3A
charging residents to join the council housing waiting list
.

Appendix 5

Q5 Are there any changes or proposals you think we should consider which might generate income?

Don't know....counter-intuitively, you need to encourage wealthy and middle-class people as we are the ones who pay the taxes you need. (or does that go to Central government?)
Engage with the arts sectors in Haringey to see what proposals, events and other things they can do with the support of the council - this draws people into the borough who spend money and furthers the stability of the borough
Unsure
Repair Hubs. Set up some Second Hand shops for the council.
The rooms upstairs in Stroud Green and Harringay Library have never really been used. Effective marketing for there use could bring in money and bring interested parties into the library. These rooms were renovated recently. What a waste to leave them empty.
Increasing costs for garden waste collection. I'd be happy to pay more than £75 a year if this meant keeping libraries functional. I have the privilege of having a garden and libraries are for everybody so i don't mind subsiding them. Increase parking fine and parking permit costs and fees and business rates. Charge fitness instructors for using parks and paid dog walkers
Not sure
Option for residents to buy an annual visitor parking permit (not just daily/hourly tickets). Fines for HMO landlords/agencies who do not look after their properties or flout planning rules.
No
As above
Camera enforcement, more traffic officers, more fines for fouling, more prosecutions on fly tipping
---
n/a
You could increase parking charges. You might consider returning to five items for free for recycling to discourage dumping.
Rent the smal rooms in the Hornsey library to artists or writers
No
None
Yes, Stop spending money on Pots plants that block the roads. This will save a lot of money.
Markets or parking on waste land not in use to bring in money sell off very old properties that are standing empty for years due to disrepair
See answer to 3 above.
Build more housing
Not particularly.
See the 20mph speed check and fines.
As above
As above. The rooms above.
Stroud Green library recently underwent an extensive renovation, and has some a great space now to offer the community for hire. No one knows about it though - with proper marketing, it could generate significant revenue if used for birthday parties, talks, meetings, etc. which in turn would drive more people into the library, who might go on to use its other services.
Case in point with library services, you could generate income by using the library infrastructure in more forward-looking, innovative ways. For example, Haringey libraries were part of a business support programme delivered through the public library infrastructure (Start-ups in London Libraries). Why has your Economic Development Team not supported this service as a permanent offering in libraries once the programme

Appendix 5

Q5 Are there any changes or proposals you think we should consider which might generate income?

ended? Many local businesses, existing and potential, benefited from the free services giving back to the local economy and achieving no doubt a demonstrable good ROI. Instead of renting spaces out in libraries to third parties, consider actually making innovative use of these with a minimal investment!
The council tax could be increased in line with ability to pay and not house size, particularly for the more well off. Parking fees could be increased as not essential to drive.
Effective marketing of the upstairs rooms for hire. Most people have no idea these are even available and I'm sure they'd be in high demand if people knew about them.These have been newly renovated to be fire-safe, accessible, and available. I cannot understand why the Council undertook an expensive renovation to then have no money to keep the doors open? It seems such a waste to have these lovely facilities and not try to get the most out of them.
Effective enforcement/fines.
Market the recently renovated upstairs rooms at Stroud Green Library
increase price for services, residents should pay for food waste bags and recycling bags same as in other councils
See point 3 above.
Renting out the room above the library.
Not sure
See above. But not item S26 School Street Programme, further charging for wrong parking in these streets.
N/A
Library workspaces - not much. We are often looking for available pitches with lighting for football in winter for our kids team. We have some money.
Roll-out of roadside charging points for EVs.
Effective marketing of the rooms upstairs in Stroud Green Library.
The refurbished flat above the SG&H Library should be rented out and the proceeds ploughed back into the needs of the library.
A growth of local markets.
Local community markets
Could run cafes wherever possible. Also, selling stationary supplies in the libraries might bring in extra income and bring more people into the libraries.
One example is effective marketing of the upstairs rooms for hire. These have been newly renovated to be fire-safe, accessible and available. I cannot understand why the Council undertook an expensive renovation to then have no money to keep the library open.
Reassess PCZs and monitor areas clearly used for ilegal parking where no fines are being imposed.
Raise council tax fairly and transparently
Better advertising of library income generating spaces
n/a
Hire out the space above the library to generate ring-fenced income for it.
Insterad creating new centres which involve building , heating cost, people cost look into adopting the ones the Council already have. As I mentioned before , broaden libraries space to generate income for themselves. Turn them into a tea and coffee place to attract people and earn money. Look National Trust places
Effective marketing of the upstairs rooms for hire. These have been newly renovated to be fire-safe, accessible, and available. I cannot understand why the Council undertook an expensive renovation to then have no money to keep the doors open? More council property should be let to local businesses. I have a business which has recently moved from Tottenham to Hackney where we are now renting a Hackney council property.

Appendix 5

Q5 Are there any changes or proposals you think we should consider which might generate income?

N/A
See my answers above and extrapolate. (This form is inadequate for filling out!)
Promote sales of books cds and dvds that are no longer required
Fundraising events
unsure
Support small community project that aim are to actually better the community. An healthier community will actually save money and resources
Hiring out vacant spaces in libraries etc
Effective marketing of the upstairs rooms for hire. These have been newly renovated to be fire-safe, accessible, and available. I cannot understand why the Council undertook an expensive renovation to then have no money to keep the doors open? More council property should be let to local businesses. I have a business which has recently moved from Tottenham to Hackney where we are now renting a Hackney council property.
Not at present.
Approach large publishers for subsidised magazines and newspapers - even if magazines are a month old, that usually does not matter. Raise profile of Council needs and target them towards tope 100 large businesses based in Haringey and also target local businesses - there is little awareness of opportunities where the business gets an immediate benefit that it needs and the local community benefits for no extra effort. Also, consider crowdfunding - offer ringfenced direct support of the areas/sectors that people and businesses might wish to support - the money to go transparently to the e.g. libraries, social care visits, waste collection, road repairs etc.
Considering the recent budget spent on renovating the library last year, a focus on income generation could involve exploring partnerships with local businesses or community organizations to sponsor events or activities within the library. Additionally, offering fee-based services or renting out library spaces for events and exhibitions could contribute to income generation while maintaining the importance of having dedicated staff rather than relying solely on CCTV cameras and self-service.
Finding ways to utilise our library spaces to make money eg options for events such as parties in parts of the library
Hire out the space for parties etc
In looking at what the Council can do to generate income , my local library at Stroud Green has recently been completely renovated (as have many of the other libraries) and there are 2 rooms upstairs which are fire safe and accessible by lift which could be marketed much better and rented out for a variety of activities. It seems strange to spend all this money on renovation and then to run down the service when it could be expanded.
Hire of the upstairs rooms. Activating volunteers.
Look at library models in London that work. Pelham for example. You turned down Mount views proposal for a drama college- what a short sighted mistake.
Rent libraries' meeting rooms to external users and advertise them properly. Convert more street lamp posts to electric car charging stations.
Use the newly refurbished rooms upstairs in Stroud Green Library! Why on earth did the council spend money on refurbishing them only to leave them un-used?! They could be made available for private hire; they could also surely be used for other community services during the day for young families and the elderly.
Events in park - need to be well managed to avoid controversy and losing this as a valuable money generating resource. Some more 'highbrow' concert promoters might help improve the image of events rather than Wireless with its associated delinquent image!
Rent out office space at the libraries? Some of them seem to have some lovely extra rooms. Rent out the libraries for evening events?

Appendix 5

Q5 Are there any changes or proposals you think we should consider which might generate income?

Making sure you are marketing the use of the upstairs rooms for hire. These have been newly renovated to be fire-safe, accessible, and available. Holding more child singing classes during the day and charging for the hire. Having a coffee station where you can charge for drinks.
See answer on previous answer at [3]
Having more holiday schemes for working parents, and school clubs, have more events such as wireless and street parties
See answer 3 above
Yes. Invite groups in to actively use these craetiev spaces.
?
How about cutting salaries for top paid officials? There seems to. be a huge increase in the investment in roads. Maybe that could be cut and the council concentrate on filling in potholes.
As previous answer.
rent out space in the libraries to generate income
None identified.
as above
More enforcement of pavement parking, littering (e.g. spot fines), dumping speeding, more ANPR fines. Charge a realistic amount for residential annual parking permits - why are people subsidised to store their cars on the street?
Increasing council tax for those in band G and above homes with discounts for the cash poor. Complex I know but where there's a will...
Please see answer to 3 above. A way to generate income from my local Library (Stroud Green and Harringay) would be to hire the rooms on the upper floor for events and other activities. These have recently been renewed and made fully safe and accessible, and provide a great space for new activities that could generate funds and also be beneficial for the local community.
See above.
See above answer.
Please see previous answer
Make sure all rooms / offices / houses of council that are not always used are offered to be rent to private businesses. Better use of council estate there you can make savings without degrading quality of life of residents
More traffic fines for speeding and bad driving.
Apply for match funding from goverment
Unsure
room rental, run paying events for children in the school holidays, run fund raisers such as book days.
Raise council tax for properties in the higher band
Using the rooms upstairs in Highgate library for classes and groups. But this must be publicised. Also other libraries could have book related events, book launches, classes, talks, all of which could generate income and increase usage.
How about collecting recycling every fortnight instead of every week?
Letting unused spaces again - eg the disused garages on the Northumberland Park estate, and empty shops eg 163 Park Lane.
Raise parking charges especially for SUVs. Rent out rooms in Stroud Green Library
Effective marketing for upstairs space? Artist studios? Community workshops? Children's party hires?

Appendix 5

Q5 Are there any changes or proposals you think we should consider which might generate income?

Higher charges of visitor permits for those in higher value homes. Greater contribution from restaurants on Green lanes to deal with rubbish issues on green lanes and surrounding areas.
Increase taxation locally and provide pressure on government to increase nationally
• As said above, academic studies, and using their EVOLS tool, show that if Haringey spends £4.24m on libraries, the return on investment is at least £25.445m. This and other studies demonstrate why cuts to libraries do not typically make any sense to the borough overall. • As Friends of the Muswell Hill library we have been working closely with the Council recently to look for ways to help change the way the library can provide significant new benefits, including new revenue generating opportunities, once the refurbishment underway is completed. However, with the sudden new and deep cuts proposed, these will now be in jeopardy.
See 3. above
Effective renting out of our library's upstairs rooms, making the library more of a community hub, offering pay for services, keep exisiting users and also atract more users, e.g. pay for printing services.
Sell property owned by council under reorganisation
There could be a much more improved marketing activities in place for upper / other rooms for private hire.these have been newly renovated and I don't believe these are bringing in the maximum income. Why did the council spend so much money and time on this renovation and now so not have enough money to keep the building open as it currently stands and within the current opening hours. It is mind boggling.
Effective marketing of the upstairs rooms for hire. These have been newly renovated to be fire-safe, accessible, and available. I cannot understand why the Council undertook an expensive renovation to then have no money to keep the doors open?
Explore options to generate revenue through new cremation facilities. Also, creating more revenue from Ally Pally through weddings, corporate events and conferences.
Hiring out library rooms
cut your wages and consider carefully how you spend the money from our taxes.
Reducing the rates for renting council rooms (in libraries) - lower rates would be more attractive to people and organisations, who could then rent/use them more often.d
The co-produced plan for Osborne Grove, when implemented, would bring in income from users.
No
More opportunities to generate income from community arts and cultural activities. It is such a shame the old Town Hall in Crouch End has been sold off and now can't be used for such purposes. It means the two sides of the Borough are very unevenly served.
Investing in renewables, engaging with local people - book clubs, writing groups, food banks, growers, seed swappers, children's clubs, computer-literacy classes, carbon-literacy classes. Create teaching spaces for local experts to run small, short courses. Clothes swaps, repair cafes - rent fairly priced space to people who will build our community.
Don't defund libraries
See above
Increase library charges and make free events payable.
Build more houses
Rent out first floor large room in library (Haringey park)
REDUCE CARS AND THEIR REQUIRED INFRASTRUCTURE, SUPPORT DELIVERY SERVICES AND HIRE CAR FACILITIES. HIGHER TAX AND PARKING COSTS ON CARS USED FOR PERSONAL USE

Appendix 5

Q5 Are there any changes or proposals you think we should consider which might generate income?

I am 84 and exercise regularly - but very few of my friends do and I can see how important it is to do so. If the council (with NHS support?) could set up exercise hubs for over 60s, possibly in local parks, this could be charged (at a low rate) and would raise money and lead to savings.
Can more be done to fill any empty shops with thriving businesses? Maybe offer a discount on premises for a year to encourage them to come in and help them with marketing???
Securing and using empty/unoccupied properties for homeless.
