February 22, 2022

Dear Property Owner:

In March of 2022, the Town of Nantucket will begin the installation of new sewer and water main infrastructure along S Shore Rd. The work includes the installation of a new gravity sewer, the new Sea St Pump Station Force Main, and an extension of the water main to the Surfside WWTF. All new pipelines will be installed within the existing town right-of-way. Construction will begin at the WWTF and proceed along S Shore Rd to Surfside Rd. Construction is planned to start on March 7th and continue until June 24th. Construction will resume on or after September 12th and is expected to continue through November. Once all of the new pipelines have been installed and tested, S Shore Rd will be repaved with new curb to curb pavement from Surfside Rd to the WWTF. Final pavement is anticipated to be completed in the Spring of 2023.

The new gravity sewer is being installed “dry”, which means that there will be no house connections allowed to the sewer at this time. A future pump station will need to be installed at the WWTF site to pump the future flow to the WWTF headworks. The new gravity sewer in S Shore Rd is being installed now so that S Shore Rd can be repaved one time.

Sewer service connections from the mainline sewer to the property line for each property along S Shore Rd will be installed so that future excavation in the paved street will not be required. Your property is located in the Miacomet Needs Area as defined in the 2014 Comprehensive Wastewater Management Plan or is already located in the sewer district and is included in the S. Shore Road Sewer Extension Project. Although you will not be able to connect your home to the new sewer at this time, it is important that we determine the best location for the connection(s) to service your property. Included with this mailing is a Sewer Service Location Form. This form will help us determine the best location for your sewer connection. Your feedback and input is important. Please complete and return the enclosed Sewer Service Location Form by March 7, 2022.

If you have any questions or concerns, please call the Sewer Department at (508) 228-7200 x7801 or email sewerproject@nantucket-ma.gov.

Very truly yours,
Town of Nantucket

David C. Gray, Director
Nantucket Sewer Department
