What do you want at the old Broadwater golf course?

Do you want paths for dog walkers and joggers, pitches for football, a bike or skate park, or rewilding to increase biodiversity?

Maybe you have some ideas of your own?

The area is a former landfill site and will need a significant re-design to ensure it remains safe for users and turn it into high-quality community greenspace.

There are many ways the site could be reconfigured, and it is large enough to support a number of different outdoor activities. We want to know what would provide the most benefit to the local community and users of the park.

We are in the very early stages of our planning, and this is an opportunity for local people to help shape the overall direction of the project
