9 Impressions of the New Building - The Hall

The new building combines the Health Visitor's room at one end with the Drop-In Hall at the other end. In between the two will be toilets and kitchen, with a workspace for staff above.

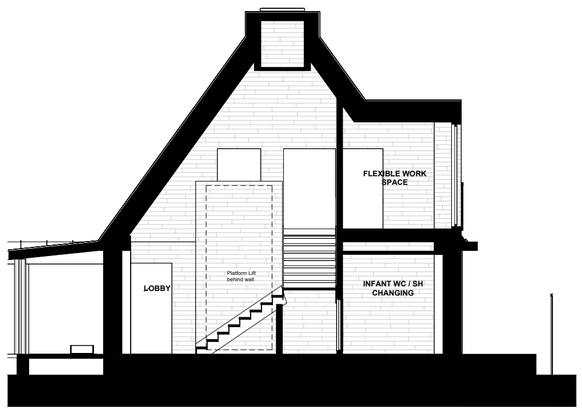

Proposed views of the Drop-In Hall and the outdoor play deck - H, I, J

The Hall is designed as a "big house" with glazing to the sides that connects the Drop-In space to the gardens outside. The double-height Hall will be constructed from engineered timber which will be exposed to create a calm and pleasant atmosphere made of natural materials. The indoor play space continues outside as a wooden play deck.
