North Tandridge:

Identified NAC Priorities

These priorities have been shaped through a collaborative and evidence-informed approach, bringing together community insight, partner expertise and wider data sources. By combining lived experience with intelligence from sectors such as health, advice services and population data, this approach creates a more rounded and grounded understanding of local need and opportunity. Importantly, this is not a one-off exercise. The priorities reflect a shared direction of travel for the Neighbourhood Area Committee (NAC) working groups taking this forward. As a result, they are intended to stay flexible and responsive over time, so they will likely evolve as both partners and residents adapt, refine, and respond together.

North Tandridge NAC priorities:

- **Youth opportunities:** Mapping local activities, tackling access barriers (cost/transport), and boosting awareness — helping more young people connect, take part, and thrive
- **Food support:** Progressing pantry plans with community input, partnerships, and funding pathway — strengthening local support for residents facing food pressures
- **Engagement:** Improving comms, widening participation, and connecting with local networks — building a more inforn and connected community
