

RESURFACING Western Ave

The City of Muskegon plans to resurface Western Avenue this fall, starting early September and being complete by mid-October. The project covers Western Avenue from 4th Street to Terrace Street.

To keep you informed and answer questions about traffic, schedule, and access during construction, we're hosting an informational session for downtown residents and businesses.

This is a straightforward resurfacing project, no changes to road layout, and has been designed to minimize disruption.

Your input and questions are welcome!
