Single Survey

survey report on:

Property address	40 Beach Boulevard Aberdeen AB24 5HD

Customer	Aberdeen City Council

Customer address	40 Beach Boulevard Aberdeen AB24 5HD

Prepared by	Shepherd Chartered Surveyors

Date of inspection	19/08/2025

SHEPHERD
CHARTERED SURVEYORS

www.shepherd.co.uk

PART 1 - GENERAL

1.1 THE SURVEYORS

The Seller has engaged the Surveyors to provide the Single Survey Report and a generic Mortgage Valuation Report for Lending Purposes. The Seller has also engaged the Surveyors to provide an Energy Report in the format prescribed by the accredited Energy Company.

The Surveyors are authorised to provide a transcript or retype of the generic Mortgage Valuation Report on to Lender specific pro-forma. Transcript reports are commonly requested by Brokers and Lenders. The transcript report will be in the format required by the Lender but will contain the same information, inspection date and valuation figure as the generic Mortgage Valuation Report and the Single Survey. The Surveyors will decline any transcript request which requires the provision of information additional to the information in the Report and the generic Mortgage Valuation Report until the Seller has conditionally accepted an offer to purchase made in writing.

Once the Seller has conditionally accepted an offer to purchase made in writing, the Purchaser's lender or conveyancer may request that the Surveyors provide general comment on standard appropriate supplementary documentation. In the event of a significant amount of documentation being provided to the Surveyors, an additional fee may be incurred by the Purchaser. Any additional fee will be agreed in writing.

If information is provided to the Surveyors during the conveyancing process which materially affects the valuation stated in the Report and generic Mortgage Valuation Report, the Surveyors reserve the right to reconsider the valuation. Where the Surveyors require to amend the valuation in consequence of such information, they will issue an amended Report and generic Mortgage Valuation Report to the Seller. It is the responsibility of the Seller to ensure that the amended Report and generic Mortgage Valuation Report are transmitted to every prospective Purchaser.

The individual Surveyor will be a member of the Royal Institution of Chartered Surveyors who is competent to survey, value and report upon Residential Property[1].

If the Surveyors have had a previous business relationship within the past two years with the Seller or Seller's Agent or relative to the property, they will be obliged to indicate this by marking the adjacent box. [X]

The Surveyors have a written complaints handling procedure. This is available from the offices of the Surveyors at the address stated.

1.2 THE REPORT

The Surveyors will not provide an amended Report on the Property, except to correct factual inaccuracies.

The Report will identify the nature and source of information relied upon in its preparation.

The Surveyor shall provide a Market Value of the Property, unless the condition of the Property is such that it would be inappropriate to do so. A final decision on whether a loan will be granted rests with the Lender who may impose retentions in line with their lending criteria. The date of condition and value of the property will be the date of inspection.

Prior to 1 December 2008, Purchasers have normally obtained their own report from their chosen Surveyor. By contrast, a Single Survey is instructed by the Seller and made available to all potential Purchasers in expectation that the successful Purchaser will have relied upon it. The Royal Institution of Chartered Surveyors rules require disclosure of any potential conflict of interest when acting for the Seller and the Purchaser in the same transaction. The Single Survey may give rise to a conflict of interest and if this is of concern to any party they are advised to seek their own independent advice.

The Report and any expressions or assessments in it are not intended as advice to the Seller or Purchaser or any other person in relation to an asking price or any other sales or marketing decisions.

[1] Which shall be in accordance with the current RICS Valuation Standards (The Red Book) and RICS Rules of Conduct.

The Report is based solely on the Property and is not to be relied upon in any manner whatsoever when considering the valuation or condition of any other property.

If certain minor matters are mentioned in the Report it should not be assumed that the Property is free of other minor defects.

Neither the whole nor any part of the Report may be published in any way, reproduced or distributed by any party other than the Seller, prospective purchasers and the Purchaser and their respective professional advisers without the prior written consent of the Surveyors.

1.3 LIABILITY

The Report is prepared with the skill and care reasonably to be expected of a competent residential surveyor who is a member of the Royal Institution of Chartered Surveyors.

The Report is addressed to the Seller and was prepared in the expectation that it (or a complete copy) along with these Terms and Conditions (or a complete copy) would (or, as the case might be, would have been) be disclosed and delivered to:

- the Seller;
- any person(s) noting an interest in purchasing the Property from the Seller;
- any person(s) who make(s) (or on whose behalf is made) an offer to purchase the Property, whether or not that offer is accepted by the Seller;
- the Purchaser; and
- the professional advisers of any of these.

The Surveyors acknowledge that their duty of skill and care in relation to the Report is owed to the Seller and to the Purchaser. The Surveyors accept no responsibility or liability whatsoever in relation to the Report to persons other than the Seller and the Purchaser. The Seller and Purchaser should be aware that if a Lender seeks to rely on this Report they do so at their own risk. In particular, the Surveyors accept no responsibility or liability whatsoever to any Lender in relation to the Report. Any such Lender relies upon the Report entirely at their own risk.

1.4 GENERIC MORTGAGE VALUATION REPORT

The Surveyors undertake to the Seller that they will prepare a generic Mortgage Valuation Report, which will be issued along with the Single Survey. It is the responsibility of the Seller to ensure that the generic Mortgage Valuation Report is provided to every potential Purchaser.

1.5 TRANSCRIPT MORTGAGE VALUATION FOR LENDING PURPOSES

The Surveyors undertake that on being asked to do so by a prospective purchaser, or his/her professional advisor or Lender, they will prepare a Transcript Mortgage Valuation Report for Lending Purposes on terms and conditions to be agreed between the Surveyors and Lender and solely for the use of the Lender and upon which the Lender may rely. The decision as to whether finance will be provided is entirely a matter for the Lender. The Transcript Mortgage Valuation Report will be prepared from information contained in the Report and the generic Mortgage Valuation Report[2].

1.6 INTELLECTUAL PROPERTY

All intellectual property rights whatsoever (including copyright) in and to the Report, excluding the headings and rubrics, are the exclusive property of the Surveyors and shall remain their exclusive property unless

[2] Which shall be in accordance with the current RICS Valuation Standards (The Red Book) and RICS Rules of Conduct.

they assign the same to any other party in writing.

1.7 PAYMENT

The Surveyors are entitled to refrain from delivering the Report to anyone until the fee and other charges for it notified to the Seller have been paid. Additional fees will be charged for subsequent inspections and Reports.

1.8 CANCELLATION

The Seller will be entitled to cancel the inspection by notifying the Surveyor's office at any time before the day of the inspection.

The Surveyor will be entitled not to proceed with the inspection (and will so report promptly to the Seller) if after arriving at the property, the Surveyor concludes that it is of a type of construction of which the Surveyor has insufficient specialist knowledge to be able to provide the inspection satisfactorily. The Surveyor will also be entitled not to proceed if after arriving at the property, the surveyor concludes that the property is exempt under Part 3 of The Housing (Scotland) Act 2006 as detailed in the (Prescribed Documents) Regulations 2008. If there is a potential threat to their health or personal safety, the inspection may be postponed or cancelled, at the Surveyor's discretion.

In the case of cancellation or the inspection not proceeding, the Surveyor will refund any fees paid by the Seller for the inspection and Report, except for expenses reasonably incurred and any fee due in light of the final paragraph of this section.

In the case of cancellation by the Seller, for whatever reason, after the inspection has taken place but before a written report is issued, the Surveyor will be entitled to raise an invoice equivalent to 80% of the agreed fee.

1.9 PRECEDENCE

If there is any incompatibility between these Terms and Conditions and the Report, these Terms and Conditions take precedence.

1.10 DEFINITIONS

- the "Lender" is the party who has provided or intends or proposes to provide financial assistance to the Purchaser towards the purchase of the Property and in whose favour a standard security will be granted over the Property;

- the "Transcript Mortgage Valuation Report for Lending Purposes" means a separate report, prepared by the Surveyor, prepared from information in the Report and the generic Mortgage Valuation Report, but in a style and format required by the Lender. The Transcript Mortgage Valuation Report for Lending Purposes will be prepared with the skill and care reasonably to be expected from a surveyor who is a member of the Royal Institution of Chartered Surveyors and who is competent to survey, value and report on the Property;

- the "Generic Mortgage Valuation Report" means a separate report, prepared by the Surveyor from information in the Report but in the Surveyor's own format;

- the "Market Value" *is the estimated amount for which a property should exchange on the date of valuation between a willing buyer and a willing seller in an arm's-length transaction after proper marketing wherein the parties had each acted knowledgeably, prudently and without compulsion;*

- the "Property" is the property which forms the subject of the Report;

- the "Purchaser" is the person (or persons) who enters into a contract to buy the Property from the Seller;

- a "prospective Purchaser" is anyone considering buying the Property;
- the "Report" is the report, of the kind described in Part 2 of these Terms and Conditions and in the form set out in part 1 of Schedule 1 of the Housing (Scotland) Act 2006 (Prescribed Documents) Regulations 2008;
- the "Seller" is/are the proprietor(s) of the Property;
- the "Surveyor" is the author of the Report on the Property; and
- the "Surveyors" are the firm or company of which the Surveyor is an employee, director, member or partner (unless the Surveyor is not an employee, director, member or partner, when the "Surveyors" means the Surveyor) whose details are set out at the head of the Report.
- the "Energy Report" is the advice given by the accredited Energy Company, based on information collected by the Surveyor during the Inspection, and also includes an Energy Performance Certificate, in a Government approved format.

PART 2 - DESCRIPTION OF THE REPORT

2.1 THE SERVICE

The Single Survey is a Report by an independent Surveyor, prepared in an objective way regarding the condition and value of the Property on the day of the inspection, and who is a member of the Royal Institution of Chartered Surveyors. It includes an Energy Report as required by Statute and this is in the format of the accredited Energy Company. In addition, the Surveyor has agreed to supply a generic Mortgage Valuation Report.

2.2 THE INSPECTION

The Inspection is a general surface examination of those parts of the Property which are accessible: in other words, *visible and readily available for examination from ground and floor levels, without risk of causing damage to the Property or injury to the Surveyor.*

All references to visual inspection refer to an inspection from within the property at floor level and from ground level within the site and adjoining public areas, without the need to move any obstructions. Any references to left or right are taken facing the front of the property.

The Inspection is carried out with the Seller's permission, without causing damage to the building or contents. Furniture, stored items and insulation are not moved.

Unless identified in the report the Surveyor will assume that no harmful or hazardous materials have been used in the construction. The presence or possible consequences of any site contamination will not be researched.

The Surveyor will not carry out an asbestos inspection, and will not be acting as an asbestos inspector in completing a Single Survey of properties that may fall within the Control of Asbestos in the Workplace Regulations. In the case of flats it will be assumed that there is a duty holder, as defined in the Regulations and that a Register of Asbestos and effective Management Plan is in place, which does not require any expenditure, or pose a significant risk to health. No enquiry of the duty holder will be made.

2.3 THE REPORT

The Report will be prepared by the Surveyor who carried out the property inspection and will describe various aspects of the property as defined by the headings of the Single Survey report with the comments

being general and unbiased. The report on the location, style and condition of the property, will be concise and will be restricted to matters that could have a material effect upon value and will omit items that, in the Surveyor's opinion, are not significant. If certain minor matters are mentioned, it should not be interpreted that the property is free of any other minor defects.

Throughout the Report, the following repair categories will be used to give an overall opinion of the state of repair and condition of the property.

1 Category 3: Urgent repairs or replacement are needed now. Failure to deal with them may cause problems to other parts of the property or cause a safety hazard. Estimates for repairs or replacement are needed now.

2 Category 2: Repairs or replacement requiring future attention, but estimates are still advised.

3 Category 1: No immediate action or repair is needed.

WARNING: If left unattended, even for a relatively short period, Category 2 repairs can rapidly develop into more serious Category 3 repairs. The existence of Category 2 or Category 3 repairs may have an adverse effect on marketability, value and the sale price ultimately achieved for the property. This is particularly true during slow market conditions when the effect can be considerable.

Parts of the property, which cannot be seen or accessed, will not be reported upon and this will be stated. If the Surveyor suspects that a defect may exist within an unexposed area and which could have a material effect upon the value, he may recommend further investigation by specialist contractors.

2.4 SERVICES

Surveyors are not equipped or qualified to test the services and therefore no comment can be interpreted as implying that the design, installation and function of the services are in accordance/compliance with regulations, safety and efficiency expectations. However, comment is made where there is cause to suspect significant defects or shortcomings with the installations. No tests are made of any services or appliances.

2.5 ACCESSIBILITY

A section is included to help identify the basic information interested parties need to know to decide whether to view a property.

2.6 ENERGY REPORT

A section is included that makes provision for an Energy Report, relative to the property. The Surveyor will collect physical data from the property and provide such data in a format required by an accredited Energy Company. The Surveyor cannot of course accept liability for any advice given by the Energy Company.

2.7 VALUATION AND CONVEYANCER ISSUES

The last section of the Report contains matters considered relevant to the Conveyancer (Solicitor). It also contains the Surveyor's opinion both of the market value of the property and of the re-instatement cost, as defined below.

"Market Value" *The estimated amount for which a property should exchange on the date of valuation between a willing buyer and a willing seller in an arm's-length transaction after proper marketing wherein the parties had each acted knowledgeably, prudently and without compulsion.* In arriving at the opinion of the Market Value the Surveyor also makes various standard assumptions covering, for example, vacant possession; tenure and other legal considerations; contamination and hazardous materials; the condition of un-inspected parts; the right to use mains services; and the exclusion of curtains, carpets etc. from the valuation. In the case of flats, the following further assumptions are made that:

- There are rights of access and exit over all communal roadways, corridors, stairways etc. and to use

communal grounds, parking areas, and other facilities;

- There are no particularly troublesome or unusual legal restrictions;
- There is no current dispute between the occupiers of the flats or any outstanding claims or losses; and the costs of repairs to the building are shared among the co-proprietors on an equitable basis.

Any additional assumption, or any found not to apply, is reported.

"Re-instatement cost" *is an estimate for insurance purposes of the current cost of rebuilding the Property in its present form* unless otherwise stated. This includes the cost of rebuilding the garage and permanent outbuildings, site clearance and professional fees, but excludes VAT (except on the fees).

Sellers or prospective Purchasers may consider it prudent to instruct a reinspection and revaluation after a period of 12 weeks (or sooner if appropriate) to reflect changing circumstances in the market and/or in the physical condition of the Property.

Single Survey

1. Information and scope of inspection

This section tells you about the type, accommodation, neighbourhood, age and construction of the property. It also tells you about the extent of the inspection and highlights anything that the surveyor could not inspect.

All references to visual inspection refer to an inspection from within the property without moving any obstructions and externally from ground level within the site and adjoining public areas. Any references to left or right in a description of the exterior of the property refer to the view of someone standing facing that part of the property from the outside.

The inspection is carried out without causing damage to the building or its contents and without endangering the occupiers or the surveyor. Heavy furniture, stored items and insulation are not moved. Unless identified in the report the surveyor will assume that no harmful or hazardous materials or techniques have been used in the construction. The presence or possible consequences of any site contamination will not be researched.

Services such as TV/cable connection, internet connection, swimming pools and other leisure facilities etc. will not be inspected or reported on.

Description	The subjects comprise a purpose built ground floor flat, forming part of an end-terraced two storey block containing two flats in total. Access is via a secure shared internal hallway.
Accommodation	GROUND FLOOR - Entrance Hallway, Living Room, Two Bedrooms, Kitchen and Wet Room with WC.
Gross internal floor area (m²)	The internal floor area extends to 68m² or thereby.
Neighbourhood and location	The subjects form part of a mixed residential and commercial area located a short distance east of Aberdeen City centre. The property was constructed on behalf of the Local Authority. Locally, a good range of services and facilities are available.
Age	Built circa 1965.
Weather	At the time of inspection the weather was dry and overcast.
Chimney stacks	None.

Roofing including roof space	**Flat roofs were visually inspected from vantage points within the property and where safe and reasonable to do so from a 3m ladder externally.** **Roof spaces were visually inspected and were entered where there was safe and reasonable access, normally defined as being from a 3m ladder within the property.** **If this is not possible, then physical access to the roof space may be taken by other means if the Surveyor deems it safe and reasonable to do so.** The roof over the building is of a flat profile and is assumed to be clad in mineral felt, although this was not inspected. No access was gained to any roof void.

Rainwater fittings	**Visually inspected with the aid of binoculars where appropriate.** Concealed guttering system set into cast iron downpipes which discharge into the drainage system.

Main walls	**Visually inspected with the aid of binoculars where appropriate.** **Foundations and concealed parts were not exposed or inspected.** The main walls appear to be constructed of precast concrete framework with infilled sections of smooth rendered blockwork and pointed Fyfestone blockwork.

Windows, external doors and joinery	**Internal and external doors were opened and closed where keys were available.** **Random windows were opened and closed where possible.** **Doors and windows were not forced open.** Windows are of double glazed timber casement type. The front and rear doors are of timber type. The fascia boards appear to be of metal panels.

External decorations	**Visually inspected.** Mostly painted timber finishes to the subject property.

Conservatories / porches	None.

Communal areas	**Circulation areas visually inspected.** Access to the subject property is by means of a secure shared internal hallway entered through timber access doors. A concrete staircase and timber handrail provides access to the upper flat.

Garages and permanent outbuildings	None.

Outside areas and boundaries	**Visually inspected.** To the rear of the property is an area of garden ground which is laid to paving slabs and lawn with boundaries defined by metal fencing. It is assumed these grounds are exclusive to the subject property, although this should be confirmed with reference to the title deeds.

Ceilings	**Visually inspected from floor level.** Ceilings are lined in plasterboard sheet.

Internal walls	**Visually inspected from floor level.** **Using a moisture meter, walls were randomly tested for dampness where considered appropriate.** Internal walls and partitions are lined in plasterboard sheets or are 'plastered on the hard'.

Floors including sub floors	**Surfaces of exposed floors were visually inspected. No carpets or floor coverings were lifted.** **Physical access to the sub floor area may be taken if the Surveyor deems it is safe and reasonable to do so, and subject to a minimum clearance of 1m between the underside of floor joists and the solum as determined from the access hatch.** **Sub-floor areas were inspected only to the extent visible from a readily accessible and unfixed hatch by way of an inverted "head and shoulders" inspection at the access point.** Flooring is a mix of suspended timber and solid concrete construction. Our inspection of flooring was partially restricted due to fitted floor coverings. No sub-floor inspection was possible.

Internal joinery and kitchen fittings	**Built-in cupboards were looked into but no stored items were moved.** **Kitchen units were visually inspected excluding appliances.** Internal doors are of flush timber type and are set within timber skirtings and facings. The kitchen is fitted with a range of wall and base units, worktop surfaces and stainless steel sink unit.

Chimney breasts and fireplaces	None.

Internal decorations	**Visually inspected.** Internal decorative finishes are generally in a mix of paint and paper with a partial wet wall finish within the wet room.

Cellars	None.

Electricity	**Accessible parts of the wiring were visually inspected without removing fittings. No tests whatsoever were carried out to the system or appliances. Visual inspection does not assess any services to make sure they work properly and efficiently and meet modern standards. If any services are turned off, the surveyor will state that in the report and will not turn them on.** Electricity is from mains supply. The electrical meter and consumer unit are located within the entrance hallway cupboard.

Gas	**Accessible parts of the system were visually inspected without removing fittings. No tests whatsoever were carried out to the system or appliances. Visual inspection does not assess any services to make sure they work properly and efficiently and meet modern standards. If any services are turned off, the surveyor will state that in the report and will not turn them on.** Gas is from mains supply. The gas meter is located externally at the rear of the building.

Water, plumbing, bathroom fittings	**Visual inspection of the accessible pipework, water tanks, cylinders and fittings without removing any insulation.** **No tests whatsoever were carried out to the system or appliances.** Water is from mains supply. Where seen, internal plumbing is of copper supply and PVC waste pipes. The wet room is fitted with a three piece suite with an electric shower unit.

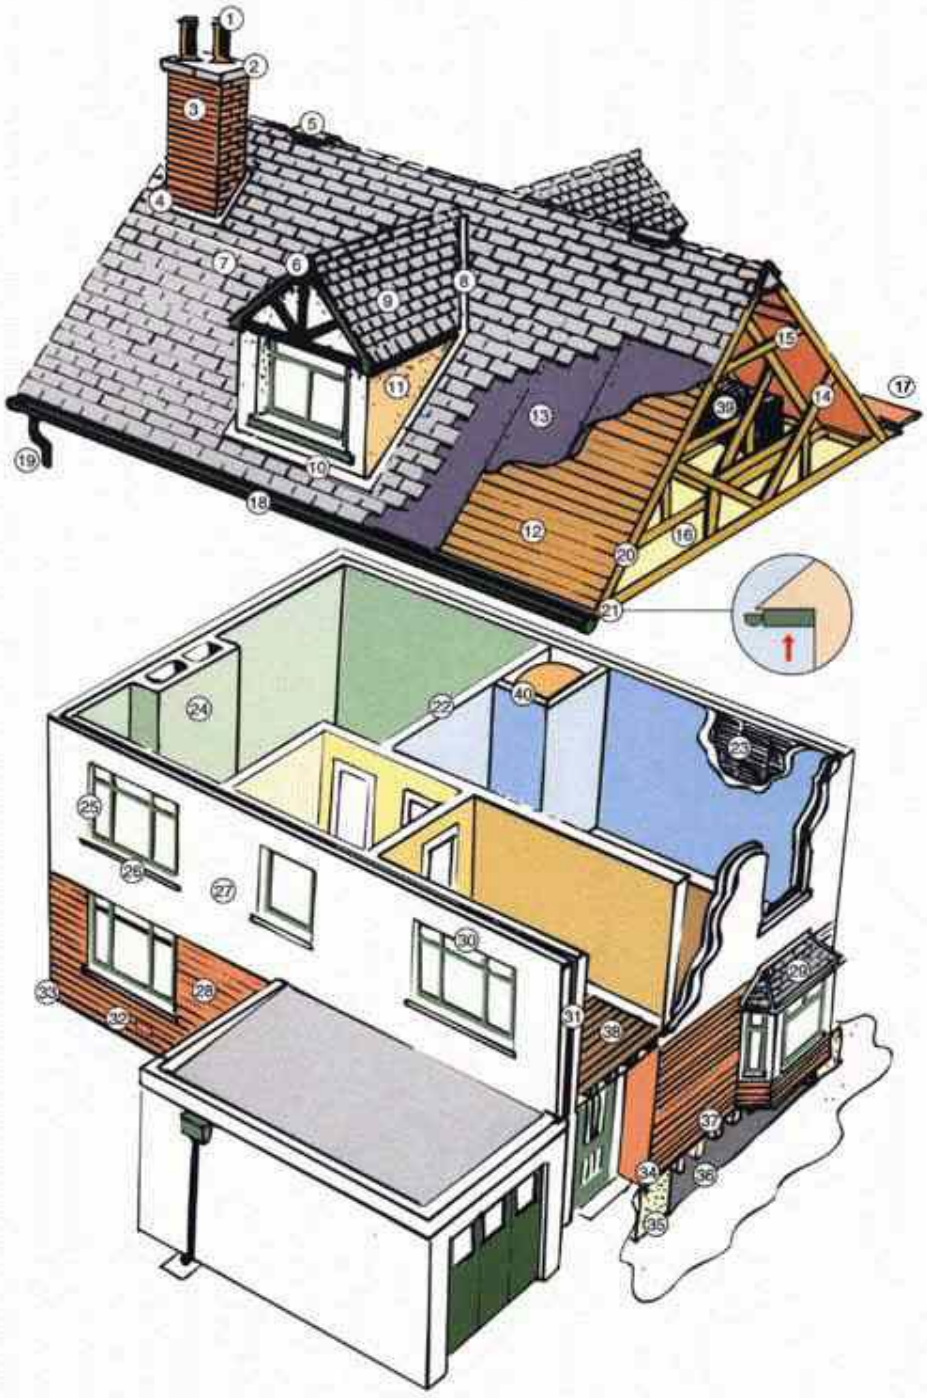

Heating and hot water	**Visual inspection of the accessible pipework, water tanks, cylinders and fittings without removing any insulation.** **No tests whatsoever were carried out to the system or appliances.** Heating and hot water are provided by the "Viessmann Vitodens" gas combination boiler which is wall mounted within a kitchen cupboard. The boiler supplies thermostatically controlled radiators throughout the accommodation and provides domestic hot water on demand.

Drainage	**Drainage covers etc. were not lifted.** **Neither drains nor drainage systems were tested.** Drainage is to main public sewer.

Fire, smoke and burglar alarms	**Visually inspected.** **No tests whatsoever were carried out to the system or appliances.** All Scottish homes require a smoke alarm to be installed in the room most frequently used for living purposes and in every circulation space on each floor. A heat alarm also needs to be installed in each kitchen. The alarms need to be ceiling mounted and interlinked. Where there is a carbon-fuelled appliance such as a boiler, open fire or wood burner, a carbon monoxide detector is also required. We have not assessed or tested any existing equipment and it is the purchasers responsibility to confirm that the property will comply with these standards following a change of ownership.

Any additional limits to inspection	**For flats / maisonettes** **Only the subject flat and internal communal areas giving access to the flat were inspected.** **If the roof space or under-building / basement is communal, reasonable and safe access is not always possible. If no inspection was possible, this will be stated. If no inspection was possible, the surveyor will assume that there are no defects that will have a material effect on the valuation.** **The building containing the flat, including any external communal areas, was visually inspected only to the extent that the surveyor is able to give an opinion on the general condition and standard of maintenance.** An inspection for Japanese Knotweed was not carried out. This is a plant which is subject to control regulation, is considered to be invasive and one which can render a property unsuitable for some mortgage lenders. It is therefore assumed that there is no Japanese Knotweed within the boundaries of the property or its neighbouring property. Identification of Japanese Knotweed is best undertaken by a specialist contractor. The property had partially fitted floor coverings. No access was available beneath sanitary or kitchen fittings. Windows and external doors were not all fully opened or tested. No access was available to any sub-floor areas. No inspection was possible to any roof space. Flat roof coverings were not inspectable. The cold water rising main was not fully inspectable.

Reference may be made in this report to some or all of the above component parts of the property. This diagram may assist you in locating and understanding these items.

2. Condition

This section identifies problems and tells you about the urgency of any repairs by using one of the following three categories:

Category 3	Category 2	Category 1
Urgent repairs or replacement are needed now. Failure to deal with them may cause problems to other parts of the property or cause a safety hazard. Estimates for repairs or replacement are needed now.	Repairs or replacement requiring future attention, but estimates are still advised.	No immediate action or repair is needed.

Structural movement	
Repair category	1
Notes	There was no evidence of significant structural movement within the limitations of our inspection.

Dampness, rot and infestation	
Repair category	3
Notes	Damp and rot related defects were found within the property including elevated moisture readings to the walls, ceiling and flooring within the Wet Room and Bedroom One, with fungal growth noted. Ponding water was also noted within Bedroom One. A reputable timber and damp specialist should carry out a full and thorough inspection of the entire property, inclusive of the sub floor, with exposure works prior to purchase.

Chimney stacks	
Repair category	N/A
Notes	None.

Roofing including roof space	
Repair category	2
Notes	There is a flat roof over the building which is assumed to be clad in mineral felt. It should be appreciated that this type of covering can have a limited life span and will require a higher than normal degree of ongoing maintenance and eventual replacement. It may be prudent to confirm the service history of the roof covering.

Rainwater fittings	
Repair category	1
Notes	We would highlight that it was not raining at the time of our inspection and we would recommend that all rainwater fittings be inspected during heavy rainfall in order to ensure they are free from defect. No view was possible of the concealed rainwater arrangements and, accordingly, no comment can be made on their condition or otherwise. These areas should be regularly checked for leakage and cleared of debris to prevent damp ingress and rot related defects which can be common in this type of building.

Main walls	
Repair category	2
Notes	Areas of cracked render and flaking paintwork were noted to main walls. Cracking was noted to the concrete deck below the first floor balcony with corrosion visible to the reinforcements. The property is of non-traditional construction and may have a higher than normal maintenance requirement. Mortgage restrictions may apply and a suitable source of finance should be obtained prior to commitment to purchase.

Windows, external doors and joinery	
Repair category	2
Notes	Windows were not all fully opened or tested, and it should be appreciated that some defects are only evident during certain weather conditions. Within the limitations of our inspection, no significant defects were noted. Windows are of an age and style where a degree of ongoing maintenance should be anticipated to sealed units and opening mechanisms. The windows are nicotine stained and will require cleaning/replacement.

External decorations	
Repair category	2
Notes	The external décor is weathered. Painted timbers will require future redecoration to prevent decay to the timbers.

Conservatories/porches	
Repair category	N/A
Notes	None.

Communal areas	
Repair category	2
Notes	Communal areas leading to and surrounding the subject property have been visually inspected where possible, however it should be appreciated that there may be a common repairing liability in respect of other parts of the building out with the scope of our inspection and this should be confirmed. Cracked glazing was noted to the communal windows within the stairwell. Staining and flaking paintwork were noted to the top floor landing ceiling.

Garages and permanent outbuildings	
Repair category	N/A
Notes	None.

Outside areas and boundaries	
Repair category	1
Notes	Boundary walls and fences should be regularly checked and maintained as necessary.

Ceilings	
Repair category	2
Notes	Dampness was noted to the ceiling within the Wet Room and Bedroom One.

Internal walls	
Repair category	2
Notes	Dampness was noted to the internal walls within the Wet Room and Bedroom One.

Floors including sub-floors	
Repair category	3
Notes	Due to fitted carpets and floor coverings no detailed inspection of floors was possible and accordingly no comment can be made on their condition. No sub floor inspection was possible. No comment can be made on the condition of the sub floor area. Elevated moisture readings were noted to the flooring within the Wet Room and Bedroom One with water ponding noted. A reputable timber and damp specialist should carry out a full and thorough inspection of the entire property, inclusive of the sub floor, with exposure works prior to purchase.

Internal joinery and kitchen fittings	
Repair category	2
Notes	Internal joinery is generally serviceable however some wear and tear items were noted to kitchen fittings/internal doors and future maintenance or upgrading should be anticipated.

Chimney breasts and fireplaces	
Repair category	N/A
Notes	None.

Internal decorations	
Repair category	2
Notes	The decor is nicotine stained throughout and will require a full course of redecoration.

Cellars	
Repair category	N/A
Notes	None.

Electricity	
Repair category	2
Notes	The Institution of Engineering Technology recommends that inspections and testings are undertaken at least every five years and on a change of occupancy. It should be appreciated that only the most recently constructed or re-wired properties will have installations which fully comply with IET regulations. A damaged socket was noted within Bedroom One which requires repair.

Gas	
Repair category	1
Notes	In the interests of safety and in light of recent regulations it would be prudent to have all gas appliances checked by a Gas Safe registered contractor.

Water, plumbing and bathroom fittings	
Repair category	3
Notes	No tests have been undertaken of the system. No inspection has been possible to enclosed timbers beneath wet appliances and no comment has been made on the condition of unseen areas. Watertight seals will require to be regularly checked and replaced, to prevent water damage to adjoining areas. Damp and rot related defects were found within the property including elevated moisture readings to the walls, ceiling and flooring within the Wet Room, with fungal growth noted. A reputable timber and damp specialist should carry out a full and thorough inspection of the entire property with exposure works prior to purchase. The system should also be checked by a reputable plumber.

Heating and hot water	
Repair category	1
Notes	It is assumed that the central heating system has been properly installed, updated and maintained to meet with all current regulations and standards with particular regard to fluing and ventilation requirements. Service records should be obtained and checked. In the absence of service documentation further advice should be obtained from a qualified heating engineer to ascertain the condition, efficiency, and life expectancy of the system.

Drainage	
Repair category	1
Notes	All foul and surface water drainage is assumed to be to the main public sewer. The system was not tested.

No immediate action or repair is needed.

Remember
The cost of repairs may influence the amount someone is prepared to pay for the property. We recommend that relevant estimates and reports are obtained in your own name.

Warning
If left unattended, even for a relatively short period, Category 2 repairs can rapidly develop into more serious Category 3 repairs. The existence of Category 2 or Category 3 repairs may have an adverse effect on marketability,value and the sale price ultimately achieved for the property. This is particularly true during slow market conditions where the effect can be considerable.

3. Accessibility information

Guidance notes on accessibility information

Three steps or fewer to a main entrance door of the property:
In flatted developments the 'main entrance' would be the flat's own entrance door, not the external door to the communal stair. The 'three steps or fewer' are counted from external ground level to the flat's entrance door. Wherea lift is present, the count is based on the number of steps climbed when using the lift.

Unrestricted parking within 25 metres:
For this purpose, 'Unrestricted parking' includes parking available by means of a parking permit. Restricted parking includes parking that is subject to parking restrictions, as indicated by the presence of solid yellow, red or white lines at the edge of the road or by a parking control sign, parking meters or other coin-operated machines.

1. Which floor(s) is the living accommodation on?	Ground			
2. Are there three steps or fewer to a main entrance door of the property?	Yes	☒	No	☐
3. Is there a lift to the main entrance door of the property?	Yes	☐	No	☒
4. Are all door openings greater than 750mm?	Yes	☐	No	☒
5. Is there a toilet on the same level as the living room and kitchen?	Yes	☒	No	☐
6. Is there a toilet on the same level as a bedroom?	Yes	☒	No	☐
7. Are all rooms on the same level with no internal steps or stairs?	Yes	☒	No	☐
8. Is there unrestricted parking within 25 metres of an entrance door to the building?	Yes	☒	No	☐

4. Valuation and conveyancer issues

This section highlights information that should be checked with a solicitor or licensed conveyancer. It also gives an opinion of market value and an estimated reinstatement cost for insurance purposes.

Matters for a solicitor or licensed conveyancer

It is assumed that there are no statutory, town planning, road proposals or environmental matters which are likely to have an adverse effect on the property.

The road and footpath adjoining the site are made up and are assumed to be adopted by the Local Authority.

Where defects or repairs have been identified within this report it is recommended that, prior to entering into any legally binding sale or purchase contract, further specialist's or contractor's advice and estimates should be obtained, to establish the implications, if any, on a potential offer to purchase or the sale price likely to be achieved for the property.

The subjects form part of a block of flats and it has been assumed that maintenance/repair costs of the common parts of the building will be shared on an equitable basis with adjoining proprietors. It is therefore assumed that the cost of common repairs detailed within the report will be apportioned accordingly although exact liability should be confirmed.

As the subjects form part of a Local Authority block of flats it may be the case that they have the right to authorise any repair or improvement schemes they deem necessary. Checks should be made with the relevant authority prior to purchase to establish if there are any proposed works for the building, including any planned or ongoing investigations as to whether RAAC concrete is present. It should be appreciated that these types of programmes can prove costly. It has been assumed there is no RAAC used in the construction of the building and no programme of repairs pending. We have not carried out a structural report on this building.

The subjects are constructed of a non-traditional form of construction with the main walls appearing to be constructed of a concrete framework with infill panels. This is a non-traditional form of construction and some mortgage lending restrictions may be in place. Mortgage finance should be confirmed prior to commitment to purchase.

Damp and rot related defects were found within the property including elevated moisture readings to the walls, ceiling and flooring within the Wet Room and Bedroom One, with fungal growth noted. Ponding water was also noted within Bedroom One. A reputable timber and damp specialist should carry out a full and thorough inspection of the entire property with exposure works prior to purchase.

Estimated reinstatement cost for insurance purposes

For Reinstatement Cost Assessment purposes, it is recommended that the subjects be insured for a sum of not less than £240,000 (TWO HUNDRED AND FORTY THOUSAND POUNDS STERLING).

This figure is the estimate of the cost of rebuilding the premises and bears no direct relationship to current market value.

Valuation and market comments

Having considered matters, taking account of our general observations on site, we are of the opinion that the Market Value of the subjects in their present condition and with the benefit of vacant possession may be fairly stated in the sum of £40,000 (FORTY THOUSAND POUNDS STERLING).

The valuation figure is on the assumption that the cost of Category 3 repairs does not greatly exceed £10,000. It should be appreciated that this is not an indication of costs and detailed reports and estimates should be obtained from all appropriate contractors and specialists to establish the full extent of the works.

Mortgage Valuation Report

General Remarks

The subjects form part of a mixed residential and commercial area located a short distance east of Aberdeen City centre. The property was constructed on behalf of the Local Authority. Locally, a good range of services and facilities are available.

At the time of inspection elements of the property were found to be in a poor order taking into account its age and type of construction. Works of repair, maintenance and renewal are required.

It is assumed that there are no statutory, town planning, road proposals or environmental matters which are likely to have an adverse effect on the property.

The road and footpath adjoining the site are made up and are assumed to be adopted by the Local Authority.

The subjects form part of a block of flats and it has been assumed that maintenance/repair costs of the common parts of the building will be shared on an equitable basis with adjoining proprietors. It is therefore assumed that the cost of common repairs detailed within the report will be apportioned accordingly although exact liability should be confirmed.

As the subjects form part of a Local Authority block of flats it may be the case that they have the right to authorise any repair or improvement schemes they deem necessary. Checks should be made with the relevant authority prior to purchase to establish if there are any proposed works for the building, including any planned or ongoing investigations as to whether RAAC concrete is present. It should be appreciated that these types of programmes can prove costly. It has been assumed there is no RAAC used in the construction of the building and no programme of repairs pending. We have not carried out a structural report on this building.

The subjects are constructed of a non-traditional form of construction with the main walls appearing to be constructed of a concrete framework with infill panels. This is a non-traditional form of construction and some mortgage lending restrictions may be in place. Mortgage finance should be confirmed prior to commitment to purchase.

Damp and rot related defects were found within the property including elevated moisture readings to the walls, ceiling and flooring within the Wet Room and Bedroom One, with fungal growth noted. Ponding water was also noted within Bedroom One. A reputable timber and damp specialist should carry out a full and thorough inspection of the entire property with exposure works prior to purchase.

Essential Repairs

Damp and rot related defects were found within the property including elevated moisture readings to the walls, ceiling and flooring within the Wet Room and Bedroom One, with fungal growth noted. Ponding water was also noted within Bedroom One. A reputable timber and damp specialist should carry out a full and thorough inspection of the entire property with exposure works prior to purchase.

Estimated cost of essential repairs	Sub to est.
Retention recommended?	[X] Yes [ ] No
Retention amount	£10,000

Comment on Mortgageability

The property is of non-traditional form of construction. Mortgage restrictions may apply and a suitable source of finance should be obtained prior to commitment to purchase.

Mortgage Valuation Report

Valuation

Market value in present condition	£ 40,000
Market value on completion of essential repairs	£ 50,000
Insurance reinstatement value	£ 240,000

(to include the cost of total rebuilding, site clearance, professional fees, ancillary charges plus VAT)

Energy Performance Certificate

Energy Performance Certificate (EPC)

Dwellings

Scotland

40 BEACH BOULEVARD, ABERDEEN, AB24 5HD

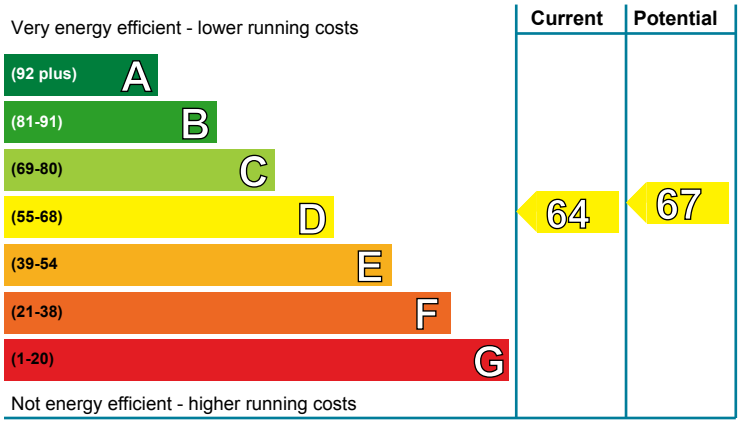

Dwelling type:	Ground-floor flat	**Reference number:**	0100-2351-2180-2795-3801
Date of assessment:	19 August 2025	**Type of assessment:**	RdSAP, existing dwelling
Date of certificate:	21 August 2025	**Approved Organisation:**	Elmhurst
Total floor area:	68 m²	**Main heating and fuel:**	Boiler and radiators, mains gas
Primary Energy Indicator:	257 kWh/m²/year		

You can use this document to:

- **Compare current ratings of properties to see which are more energy efficient and environmentally friendly**
- **Find out how to save energy and money and also reduce CO_2 emissions by improving your home**

Estimated energy costs for your home for 3 years*	**£3,996**	See your recommendations report for more information
Over 3 years you could save*	**£402**	

* based upon the cost of energy for heating, hot water, lighting and ventilation, calculated using standard assumptions

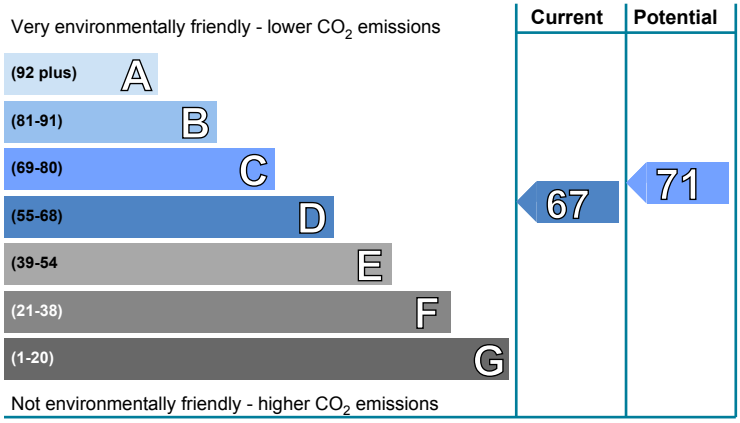

Energy Efficiency Rating

This graph shows the current efficiency of your home, taking into account both energy efficiency and fuel costs. The higher this rating, the lower your fuel bills are likely to be.

Your current rating is **band D (64)**. The average rating for EPCs in Scotland is **band D (61).**

The potential rating shows the effect of undertaking all of the improvement measures listed within your recommendations report.

Environmental Impact (CO_2) Rating

This graph shows the effect of your home on the environment in terms of carbon dioxide (CO_2) emissions. The higher the rating, the less impact it has on the environment.

Your current rating is **band D (67)**

The potential rating shows the effect of undertaking all of the improvement measures listed within your recommendations report.

Top actions you can take to save money and make your home more efficient

Recommended measures	Indicative cost	Typical savings over 3 years
1 Floor insulation (suspended floor)	£5,000 - £10,000	£339.00
2 Low energy lighting	£60 - £70	£66.00

A full list of recommended improvement measures for your home, together with more information on potential cost and savings and advice to help you carry out improvements can be found in your recommendations report.

To find out more about the recommended measures and other actions you could take today to stop wasting energy and money, visit greenerscotland.org or contact Home Energy Scotland on 0808 808 2282.

THIS PAGE IS THE ENERGY PERFORMANCE CERTIFICATE WHICH MUST BE AFFIXED TO THE DWELLING AND NOT BE REMOVED UNLESS IT IS REPLACED WITH AN UPDATED CERTIFICATE

Summary of the energy performance related features of this home

This table sets out the results of the survey which lists the current energy-related features of this home. Each element is assessed by the national calculation methodology; 1 star = very poor (least efficient), 2 stars = poor, 3 stars = average, 4 stars = good and 5 stars = very good (most efficient). The assessment does not take into consideration the condition of an element and how well it is working. 'Assumed' means that the insulation could not be inspected and an assumption has been made in the methodology, based on age and type of construction.

Element	Description	Energy Efficiency	Environmental
Walls	System built, as built, no insulation (assumed) System built, as built, partial insulation (assumed)	★☆☆☆☆ ★★★☆☆	★☆☆☆☆ ★★★☆☆
Roof	(another dwelling above)	—	—
Floor	Suspended, no insulation (assumed)	—	—
Windows	Fully double glazed	★★☆☆☆	★★☆☆☆
Main heating	Boiler and radiators, mains gas	★★★★☆	★★★★☆
Main heating controls	Programmer, room thermostat and TRVs	★★★★☆	★★★★☆
Secondary heating	None	—	—
Hot water	From main system	★★★★☆	★★★★☆
Lighting	Below average lighting efficiency	★★☆☆☆	★★☆☆☆

The energy efficiency rating of your home

Your Energy Efficiency Rating is calculated using the standard UK methodology, RdSAP. This calculates energy used for heating, hot water, lighting and ventilation and then applies fuel costs to that energy use to give an overall rating for your home. The rating is given on a scale of 1 to 100. Other than the cost of fuel for electrical appliances and for cooking, a building with a rating of 100 would cost almost nothing to run.

As we all use our homes in different ways, the energy rating is calculated using standard occupancy assumptions which may be different from the way you use it. The rating also uses national weather information to allow comparison between buildings in different parts of Scotland. However, to make information more relevant to your home, local weather data is used to calculate your energy use, CO_2 emissions, running costs and the savings possible from making improvements.

The impact of your home on the environment

One of the biggest contributors to global warming is carbon dioxide. The energy we use for heating, lighting and power in our homes produces over a quarter of the UK's carbon dioxide emissions. Different fuels produce different amounts of carbon dioxide for every kilowatt hour (kWh) of energy used. The Environmental Impact Rating of your home is calculated by applying these 'carbon factors' for the fuels you use to your overall energy use.

The calculated emissions for your home are 45 kg $CO_2/m^2/yr$.

The average Scottish household produces about 6 tonnes of carbon dioxide every year. Based on this assessment, heating and lighting this home currently produces approximately 3.1 tonnes of carbon dioxide every year. Adopting recommendations in this report can reduce emissions and protect the environment. If you were to install all of these recommendations this could reduce emissions by 0.4 tonnes per year. You could reduce emissions even more by switching to renewable energy sources.

Estimated energy costs for this home

	Current energy costs	Potential energy costs	Potential future savings
Heating	£2,955 over 3 years	£2,625 over 3 years	You could save £402 over 3 years
Hot water	£825 over 3 years	£825 over 3 years	
Lighting	£216 over 3 years	£144 over 3 years	
Totals	**£3,996**	**£3,594**	

These figures show how much the average household would spend in this property for heating, lighting and hot water. This excludes energy use for running appliances such as TVs, computers and cookers, and the benefits of any electricity generated by this home (for example, from photovoltaic panels). The potential savings in energy costs show the effect of undertaking all of the recommended measures listed below.

Recommendations for improvement

The measures below will improve the energy and environmental performance of this dwelling. The performance ratings after improvements listed below are cumulative; that is, they assume the improvements have been installed in the order that they appear in the table. Further information about the recommended measures and other simple actions to take today to save money is available from the Home Energy Scotland hotline which can be contacted on 0808 808 2282. Before carrying out work, make sure that the appropriate permissions are obtained, where necessary. This may include permission from a landlord (if you are a tenant) or the need to get a Building Warrant for certain types of work.

Recommended measures	Indicative cost	Typical saving per year	Rating after improvement	
			Energy	Environment
1 Floor insulation (suspended floor)	£5,000 - £10,000	£113	D 66	C 71
2 Low energy lighting for all fixed outlets	£60 - £70	£22	D 67	C 71

Alternative measures

There are alternative improvement measures which you could also consider for your home. It would be advisable to seek further advice and illustration of the benefits and costs of such measures.

- Cavity, internal or external wall insulation

Choosing the right improvement package

For free and impartial advice on choosing suitable measures for your property, contact the Home Energy Scotland hotline on 0808 808 2282 or go to www.greenerscotland.org.

energy saving trust

About the recommended measures to improve your home's performance rating

This section offers additional information and advice on the recommended improvement measures for your home

1 Floor insulation (suspended floor)
Insulation of a floor will significantly reduce heat loss; this will improve levels of comfort, reduce energy use and lower fuel bills. Suspended floors can often be insulated from below but must have adequate ventilation to prevent dampness; seek advice about this if unsure. Further information about floor insulation is available from many sources including www.energysavingtrust.org.uk/scotland/Insulation/Floor-insulation. Building regulations generally apply to this work so it is best to check with your local authority building standards department.

2 Low energy lighting
Replacement of traditional light bulbs with energy saving bulbs will reduce lighting costs over the lifetime of the bulb, and they last many times longer than ordinary light bulbs. Low energy lamps and fittings are now commonplace and readily available. Information on energy efficiency lighting can be found from a wide range of organisations, including the Energy Saving Trust (http://www.energysavingtrust.org.uk/home-energy-efficiency/lighting).

Low and zero carbon energy sources

Low and zero carbon (LZC) energy sources are sources of energy that release either very little or no carbon dioxide into the atmosphere when they are used. Installing these sources may help reduce energy bills as well as cutting carbon.
LZC energy sources present: There are none provided for this home

Your home's heat demand

In this section, you can see how much energy you might need to heat your home and provide hot water. These are estimates showing how an average household uses energy. These estimates may not reflect your actual energy use, which could be higher or lower. You might spend more money on heating and hot water if your house is less energy efficient. The table below shows the potential benefit of having your loft and walls insulated. Visit https://energysavingtrust.org.uk/energy-at-home for more information.

Heat demand	Existing dwelling	Impact of loft insulation	Impact of cavity wall insulation	Impact of solid wall insulation
Space heating (kWh per year)	11,293.34	N/A	N/A	N/A
Water heating (kWh per year)	1,688.68			

Addendum

This dwelling is a system built property or some of its walls are of non-conventional construction and requires further investigation to establish the type of construction, the type of wall insulation best suited (cavity insulation or internal/external insulation) and the savings it might deliver. Please contact the Home Energy Scotland hotline on 0808 808 2282 to find out more.

About this document

This Recommendations Report and the accompanying Energy Performance Certificate are valid for a maximum of ten years. These documents cease to be valid where superseded by a more recent assessment of the same building carried out by a member of an Approved Organisation.

The Energy Performance Certificate and this Recommendations Report for this building were produced following an energy assessment undertaken by an assessor accredited by Elmhurst (www.elmhurstenergy.co.uk), an Approved Organisation Appointed by Scottish Ministers. The certificate has been produced under the Energy Performance of Buildings (Scotland) Regulations 2008 from data lodged to the Scottish EPC register. You can verify the validity of this document by visiting www.scottishepcregister.org.uk and entering the report reference number (RRN) printed at the top of this page.

Assessor's name:	Mr. Alasdair Stark
Assessor membership number:	EES/025753
Company name/trading name:	J & E Shepherd
Address:	35 Queens Road Aberdeen AB15 4ZN
Phone number:	01224 202800
Email address:	aberdeen@shepherd.co.uk
Related party disclosure:	No related party

If you have any concerns regarding the content of this report or the service provided by your assessor you should in the first instance raise these matters with your assessor and with the Approved Organisation to which they belong. All Approved Organisations are required to publish their complaints and disciplinary procedures and details can be found online at the web address given above.

Use of this energy performance information

Once lodged by your EPC assessor, this Energy Performance Certificate and Recommendations Report are available to view online at www.scottishepcregister.org.uk, with the facility to search for any single record by entering the property address. This gives everyone access to any current, valid EPC except where a property has a Green Deal Plan, in which case the report reference number (RRN) must first be provided. The energy performance data in these documents, together with other building information gathered during the assessment is held on the Scottish EPC Register and is available to authorised recipients, including organisations delivering energy efficiency and carbon reduction initiatives on behalf of the Scottish and UK governments. A range of data from all assessments undertaken in Scotland is also published periodically by the Scottish Government. Further information on these matters and on Energy Performance Certificates in general, can be found at www.gov.scot/epc.

Advice and support to improve this property

There is support available, which could help you carry out some of the improvements recommended for this property on page 3 and stop wasting energy and money.For more information, visit greenerscotland.org or contact Home Energy Scotland on 0808 808 2282.

Home Energy Scotland's independent and expert advisors can offer free and impartial advice on all aspects of energy efficiency, renewable energy and more.

Property Questionnaire

property questionnaire

Property address	**40 Beach Boulevard Aberdeen AB24 5HD**

Seller(s)	**Aberdeen City Council**

Completion date of property questionnaire	**19/08/2025**

Note for sellers

- **Please complete this form carefully. It is important that your answers are correct.**
- **The information in your answers will help ensure that the sale of your house goes smoothly. Please answer each question with as much detailed information as you can.**
- **If anything changes after you fill in this questionnaire but before the date of entry for the sale of your house, tell your solicitor or estate agent immediately.**

Information to be given to prospective buyer(s)

1.	**Length of ownership**	
	How long have you owned the property?	
2.	**Council tax**	
	Which Council Tax band is your property in?	
3.	**Parking**	
	What are the arrangements for parking at your property? **(Please tick all that apply)** • **Garage** ☐ • **Allocated parking space** ☐ • **Driveway** ☐ • **Shared parking** ☐ • **On street** ☐ • **Resident permit** ☐ • **Metered Parking** ☐ • **Other (please specify):** ☐	
4.	**Conservation area**	
	Is your property in a designated Conservation Area (that is an area of special architectural or historical interest, the character or appearance of which it is desirable to preserve or enhance)?	

5.	**Listed buildings**	
	Is your property a Listed Building, or contained within one (that is a building recognised and approved as being of special architectural or historical interest)?	
6.	**Alterations/additions/extensions**	
a.	**(i) During your time in the property, have you carried out any structural alterations, additions or extensions (for example, provision of an extra bath/shower room, toilet, or bedroom)?** **<u>If you have answered yes</u>, please describe below the changes which you have made:**	
	(ii) Did you obtain planning permission, building warrant, completion certificate and other consents for this work? **<u>If you have answered yes</u>, the relevant documents will be needed by the purchaser and you should give them to your solicitor as soon as possible for checking.** **If you do not have the documents yourself, please note below who has these documents and your solicitor or estate agent will arrange to obtain them:**	
b.	**Have you had replacement windows, doors, patio doors or double glazing installed in your property?** **<u>If you have answered yes</u>, please answer the three questions below:**	
	(i) Were the replacements the same shape and type as the ones you replaced?	
	(ii) Did this work involve any changes to the window or door openings?	
	(iii) Please describe the changes made to the windows doors, or patio doors (with approximate dates when the work was completed): **Please give any guarantees which you received for this work to your solicitor or estate agent.**	
7.	**Central heating**	
a.	**Is there a central heating system in your property?** **(Note: a partial central heating system is one which does not heat all the main rooms of the property — the main living room, the bedroom(s), the hall and the bathroom).** **<u>If you have answered yes or partial</u> – what kind of central heating is there? (Examples: gas-fired, solid fuel, electric storage heating, gas warm air).**	

	<u>If you have answered yes</u>, please answer the three questions below:	
	i) When was your central heating system or partial central heating system installed?	
	(ii) Do you have a maintenance contract for the central heating system? **<u>If you have answered yes,</u> please give details of the company with which you have a maintenance contract:**	
	(iii) When was your maintenance agreement last renewed? **(Please provide the month and year).**	
8.	**Energy Performance Certificate**	
	Does your property have an Energy Performance Certificate which is less than 10 years old?	
9.	**Issues that may have affected your property**	
a.	**Has there been any storm, flood, fire or other structural damage to the property while you have owned it?** **<u>If you have answered yes</u>, is the damage the subject of any outstanding insurance claim?**	
b.	**Are you aware of the existence of asbestos in your property?** **<u>If you have answered yes</u>, please give details:**	
10.	**Services**	

a. **Please tick which services are connected to your property and give details of the supplier:**

Services	Connected	Supplier
Gas or liquid petroleum gas		
Water mains or private water supply		
Electricity		
Mains drainage		
Telephone		
Cable TV or satellite		

	Broadband		
b.	**Is there a septic tank system at your property?** **<u>If you have answered yes</u>, please answer the two questions below:**		
	(i) Do you have appropriate consents for the discharge from your septic tank?		
	(ii) Do you have a maintenance contract for your septic tank? **<u>If have answered yes</u>, details of the company with which you have a maintenance contract:**		
11.	**Responsibilities for shared or common areas**		
a.	**Are you aware of any responsibility to contribute to the cost of anything used jointly, such as the repair of a shared drive, private road, boundary, or garden area?** **<u>If you have answered yes</u>, please give details:**		
b.	**Is there a responsibility to contribute to repair and maintenance of the roof, common stairwell or other common areas?** **<u>If you have answered yes</u>, please give details:**		
c.	**Has there been any major repair or replacement of any part of the roof during the time you have owned the property?**		
d.	**Do you have the right to walk over any of your neighbours'property — for example to put out your rubbish bin or to maintain your boundaries?** **<u>If you have answered yes</u>, please give details:**		
e.	**As far as you are aware, do any of your neighbours have the right to walk over your property, for example to put out their rubbish bin or to maintain their boundaries?** **<u>If you have answered yes</u>, please give details:**		
f.	**As far as you are aware, is there a public right of way across any part of your property? (public right of way is a way over which the public has a right to pass, whether or not the land is privately-owned.)** **<u>If you have answered yes</u>, please give details:**		
12.	**Charges associated with the property**		
a.	**Is there a factor or property manager for your property?**		

	<u>If you have answered yes</u>, please provide the name and address,and give details of any deposit held and approximate charges:	
b.	**Is there a common buildings insurance policy?** **<u>If you have answered yes</u>, is the cost of the insurance included in monthly/annual factor's charges?**	
c.	**Please give details of any other charges you have to pay on a regular basis for the upkeep of common areas or repair works, for example to a residents' association, or maintenance or stair fund.**	
13.	**Specialist work**	
a.	**As far as you are aware, has treatment of dry rot, wet rot, damp or any other specialist work ever been carried out to your property?** **<u>If you have answered yes</u>, please say what the repairs were for, whether you carried out the repairs (and when) or if they were done before you bought the property.**	
b.	**As far as you are aware, has any preventative work for dry rot,wet rot, or damp ever been carried out to your property?** **<u>If you have answered yes</u>, please give details:**	
c.	**<u>If you have answered yes</u> to 13(a) or (b), do you have any guarantees relating to this work?** **<u>If you have answered yes</u>, these guarantees will be needed by the purchaser and should be given to your solicitor as soon as possible for checking. If you do not have them yourself <u>please write below who has these documents</u> and your solicitor or estate agent will arrange for them to be obtained. You will also need to provide a description of the work carried out. This may be shown in the original estimate.** **Guarantees are held by:**	
14.	**Guarantees**	
a.	**Are there any guarantees or warranties for any of the following?**	
	(i) Electrical work	
	(ii) Roofing	
	(iii) Central heating	
	(iv) National House Building Council (NHBC)	
	(v) Damp course	
	(vi) Any other work installations? (for example, cavity wall installation, underpinning, indemnity policy)	

b.	**<u>If you have answered 'yes' or 'with title deeds'</u>, please give details of the work or installations to which the guarantee(s) relate(s):**	
c.	**Are there any outstanding claims under any of the guarantees listed above?<u>If you have answered yes,</u> please give details:**	
15.	**Boundaries**	
	So far as you are aware, has any boundary of your property been moved in thelast 10 years? **<u>If you have answered yes</u>, please give details:**	
16.	**Notices that affect your property**	
	In the past three years have you ever received a notice:	
a.	**advising that the owner of a neighbouring property has made a planning application?**	
b.	**that affects your property in some other way?**	
c.	**that requires you to do any maintenance, repairs or improvements to your property?**	
	<u>If you have answered yes to any of a–c above</u>, please give the notices to your solicitor or estate agent, including any notices which arrive at any time before the date of entry of the purchaser of your property.	

Declaration by the seller(s)/or other authorised body or person(s)

This PQ could not be completed, the vendor is absentee and does not hold any information on the history of the property and has never stayed in the subject property
