

## TOWN OF RENFREW – MASTER SERVICING PLAN

### Municipal Class Environmental Assessment: Notice of Study Commencement & Public Information Centre (PIC)

The Town of Renfrew (Town) is undertaking a comprehensive review of its existing potable water, stormwater, and wastewater systems to better understand their current condition and evaluate their capacity to support future growth. As part of this initiative, the Town will update their Master Servicing Plan (study area shown in **Figure 1**), which will include an assessment of the wastewater and stormwater collection systems as well as the potable water distribution system. The updated Master Servicing Plan will identify opportunities to optimize the performance of existing infrastructure and establish a phased timeline for future expansions required to accommodate anticipated growth.

*Figure 1: Town of Renfrew Master Servicing Plan Limits*

The study is being undertaken in accordance with Approach #1 of the Master Planning Process, as outlined in Section A.2.7.1. of the Municipal Class Environmental Assessment (MCEA) document (2024). As such the Master Servicing Plan will address Phases 1 and 2 of the MCEA process and would therefore become the basis for, and be used in support of, future investigations for the specific Schedule B and C projects identified within it.

### **How to get involved?**

Various opportunities for public involvement will be provided during this important study. Your feedback is encouraged to provide input on project planning by helping to identify potential water and wastewater servicing needs and opportunities.

We invite you to join our upcoming online Public Information Centre (PIC) to learn more about the project, ask our team questions, and provide feedback. Listening to, and learning from, Indigenous Nations and organizations, residents, businesses, government agencies, and interest groups is part of the process.

PIC Materials to be hosted on the study website and made available January 26-February 9, 2026

PIC Virtual Project Team Member Availability (link to be provided on the study website) to be offered on February 10, 2026, from 7-8:30pm.
