- 3 Weir Hall Open Space Group etc.

SUMMER 2024 FEEDBACK HEADLINES

Very positive · Positive · Neutral · Negative · Very negative · No response

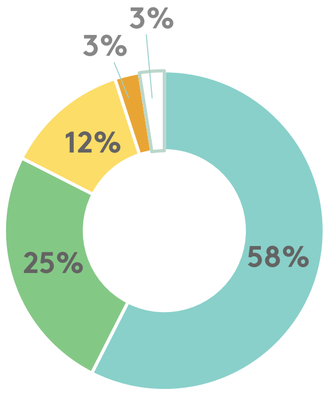

Q How do you feel about the overall proposals for Bull Lane Park, including the new outdoor sports facilities, play spaces and landscape designs?

"It's great that the plans include council housing and places for children to play. The park/field space hasn't felt safe for a long time, so we hope making it safe and accessible for women and girls and families is a priority."

"Any improvement is welcome here as the current site is very poorly maintained. By the same token, there needs to be a plan for ongoing maintenance."

Q How do you feel about the design proposals for the new Selby Centre, to create an inviting and dynamic space for diverse communities?

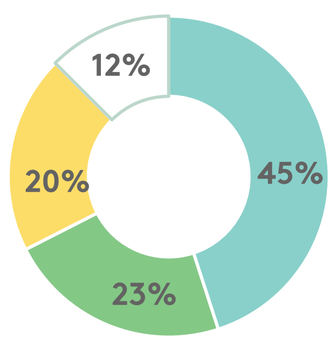

"The plans seem very accessible and comprehensive."

"Wonderful. Sports is a key component to a healthy lifestyle and this can help to combat anti-social behavior."

"We need a new community centre and access to some independent offices. Car parking for staff is very important as we use cars to get to office."

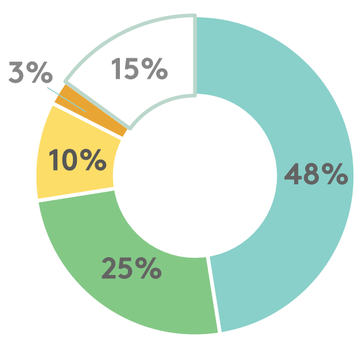

Q How do you feel about the designs for the new 4-Court Sports Hall and Changing Pavilion in the park?

"People hardly use the field as it's been very poorly maintained for many years but now there will be more residents and people from other boroughs coming down to use it more pleasantly."

Will be so much better for the environment. Residents living in the area deserve out door facilities nearby especially for the kids they won't have to travel far to able to use these facilities.

Q How do you feel about our design proposals for new Council Homes, including the layouts and the new 'green spine' street, prioritising pedestrians to link to the park?

"Council-rented mixed housing is much needed in this area of Haringey. I support funding coming from GLA."

"It will be nice to have a place to meet and talk to neighbors."
