

## THE WHY BEHIND THE DESIGN

# Our Design Option 1

**Option 1** is all about energy, imagination, and inclusive play. This layout brings something for every age and ability, creating a vibrant space where the whole community can connect and kids can explore from every angle.

At the heart of the design is a large R5 play system for ages 5–12, packed with features that challenge and excite. You'll find a Triple Twister Slide that's made for fast, social play, a Crawl-Netix for strength and coordination, and a Lunar Net Wall that's perfect for adventurous climbers. To make sure everyone can join in the fun, we've included a ramp-accessible play area filled with interactive games that spark memory, matching, and imaginative play. This space also connects to the slide deck using bumming steps—a fun and approachable option for kids who want to take on new challenges at their own pace.

For younger explorers, there's a dedicated toddler zone with its own scaled-down structure full of easy-access climbers, a slide, and an interactive panel. Everything here is designed to help little ones build confidence, imagination, and independence while staying safely within view of parents.

To round it out, we've included freestanding play elements that are just plain fun: a Bucket Spinner, Tyke Seesaw, and even a Toddler Tractor. These add movement, balance, and creativity to the mix—and they're great for all kinds of sensory and social play. Right beside the main structure, you'll also find a swing set with two side-by-side belt swings and a PlayShare seat, allowing adults and toddlers to swing together and share the moment.

Everything is built to meet accessibility standards, and we've made sure the layout flows well for supervision and ease of use. Whether it's sliding, climbing, spinning, or make-believe driving, this design invites kids to move, laugh, and grow together.

## THE WHY BEHIND THE DESIGN

# Our Design Option 2

**Option 2** is full of big energy, variety, and inclusive fun. This layout is designed to offer maximum play value for every age and ability, creating a dynamic space where movement, creativity, and connection come together in one seamless flow.

At the centre is a bold R5 structure designed for ages 2–12, featuring a mix of slides, climbers, and interactive panels that encourage physical challenge and social play. It's got everything from a Castle Wall Climber and Matrix Rope Net Wall to a Memory Panel, Inclined Arches, and a Wave Slide—all anchored by a whimsical peaked roof that gives it a sense of adventure. To make sure everyone can join in the fun, we've included a Dynamic ramp filled with interactive brain games and promotes the use of fine motor skills.

This design is also full of freestanding pieces that dial up the fun:

- The Inclusive Merry-Go-Round adds dynamic movement and social connection for all ages and abilities.
- A 2-bay swing set, including an accessible seat, ensures everyone gets their turn to soar.
- A Tyke Seesaw, Playshare Swing, and a cheerful Toddler Buggy round out the mix, offering motion, cooperation, and role play for younger users.

With a mix of ground-level features and elevated challenges, this layout supports inclusive play and easy supervision. There's plenty of seating and space for caregivers to stay close, and the layout naturally encourages kids to circulate through the whole park together.
