ROOSEVELT DRIVE COMPLETE STREET PROJECT

Greetings,

The City of Winter Haven is pleased to announce the start of the much-anticipated Roosevelt Drive Complete Street Project. Beginning in early August, you will see the contractor mobilizing and starting construction activities. The project is anticipated to be completed by Summer 2027.

The Roosevelt Drive Complete Street Project is designed to improve safety, connectivity, and aging utility infrastructure throughout the corridor. Planned improvements include roadway reconstruction and a through connection to Register Road, stormwater and utility upgrades, new pedestrian accommodations and landscaping.

We recognize that construction activities may create temporary inconveniences. Maintaining access to businesses and properties throughout construction is a priority for both the City and the contractor. While temporary lane closures, traffic shifts, and construction activity should be expected, every effort will be made to minimize disruptions and provide advance notice of significant impacts whenever possible.

To learn more about the project, please visit the Advancing Winter Haven project page. There you will find a project overview, frequently asked questions, information regarding road closures and project costs, as well as contact information for the project team. For quick access, simply scan the QR code below. We encourage you to subscribe to the project page and follow along for construction updates throughout construction.

If you have any questions, please do not hesitate to contact us at 863-291-5260. My team and I are happy to discuss the project and answer any questions you may have.

Thank you in advance for your patience, cooperation, and support as we make these important improvements to Winter Haven's transportation infrastructure. We appreciate your partnership as we work to create a safer and more connected Roosevelt Drive.

Sincerely,

Brittany Hart
