Surrey's Greener Future

# OUR PRIORITIES - THE NEXT 5 YEARS

## WHAT DO YOU CARE ABOUT?

- Healthcare
- Climate Change
- NHS Privatisation
- Environment & nature

Every month, Surrey residents *consistently* rate these 4 priorities in their top 5 concerns.

A whopping **68%** think action on climate & environment is 'extremely' or 'very' important.

Only a tiny minority of 5% think it's 'not important'.

## WHY DO YOU CARE?

Be it cold homes, nature loss, lack of healthy travel options, or flooding, these priorities impact our everyday lives. Tackling them in a joined-up way can improve the lives and work of our communities.

Take transport as an example - Surrey is in the top 5 worst areas for traffic in the country, and as a result of traffic:

**£550M**
is lost to the Surrey economy *every year*

**5.7%**
our air quality-related deaths are higher than the national average

**44%**
nearly half of our emissions are from transport

## POPULAR SOLUTIONS

**86%**
of Surrey residents think renewable energy should be a government priority.

**48%**
of Surrey residents think we should focus on consumption to tackle climate change.

**72%**
Heat pump owners are the most satisfied amongst all heating system owners - but they're still too expensive for most of us.

## WHAT CAN WE DO TOGETHER?

By getting our Climate Change Delivery Plan right, we can adopt joined-up solutions to tackle resident concerns. But we can't do it without your help. Get involved and help us plan the next 5 years together...
