4 Design Considerations and Concept

Main features and benefits of the proposed Family Hub

The proposed Queens Park Family Hub will provide for:

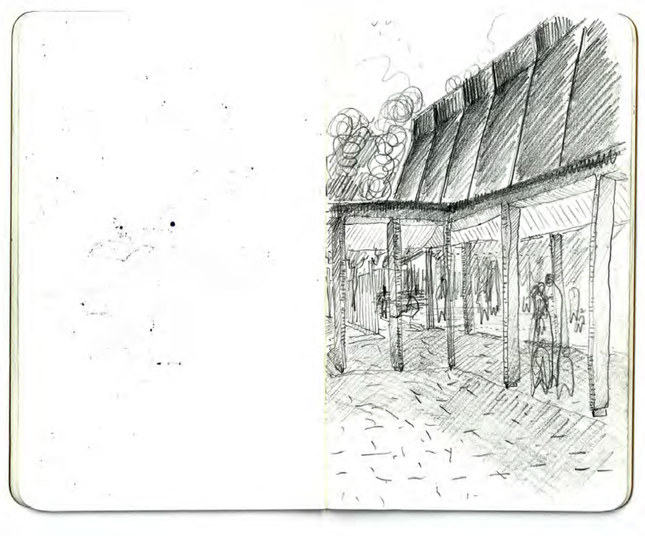

A high quality architectural scheme that houses a range of family-focused services and facilities, including:

- Health visitor clinic rooms
- Midwifery clinic rooms
- Community drop-in spaces
- Family rooms with children's play spaces
- Flexible meeting rooms, and workspace for related council and partner organisations
- A landscaped courtyard garden, providing space for relaxation, socialising and play
- A new pedestrian link to Queen's Park Gardens
- New buggy and cycle storage accessible to the front of the building from Third Avenue

Services and activities offered at the existing Bravington Road site would continue to be offered by the new Queens Park Family Hub, including a range of children's activities and various health and support programmes. The proposal seeks to provide more appropriate spaces for these activities and services.
