Dear Local Resident,

With the worst of the wet weather now hopefully behind us and spring well and truly here, works on site have continued to progress well over the past month. Many residents will have noticed the welcome change on site (and not just the blue skies), with brickwork and scaffolding rising above ground level and the development beginning to take on its visible form.

The end of March marked another important milestone for the project, with the successful installation of the first floor and concrete staircase. This achievement represented a key step forward in the build programme and allows construction to move smoothly into the next phase with the second floor due on site imminently.

We would like to thank residents for their continued patience and understanding while works progress. Construction will now continue up to second floor level, and we remain committed to keeping the community informed with regular updates as the development moves forward.

If you have any queries whatsoever regarding the works or the site, please do not hesitate to contact Vasyl. Alternatively, you can contact our Resident Liaison Officer, Nicola McCalla, on 01268 711117.

Finally, we would like to remind residents that building sites can be dangerous places. We kindly ask for your cooperation in reminding any children in your care of the dangers of playing on construction sites and the importance of keeping well away at all times.

24 Hour Emergency

In the event of an out of hours emergency or if you spot something untoward on site, please telephone 01268 436449 and you will be diverted to a team member who will be able to assist.
