

# Move Downtown

## What is Move Downtown?

The Move Downtown project (Project) will analyze the multimodal transportation network and land use compatibility to improve safety, mobility, economic vitality, and sustainability and create a unified vision for Downtown Stockton. Move Downtown will serve to benefit all users of the local and regional transportation system, as well as the residents, businesses, property owners, and visitors of the project area.

The Project will explore opportunities to increase transit-oriented development and improve access and mobility between the Downtown Transit Center (DTC), Cabral Station, and San Joaquin Street Station. This effort will result in a vision document that identifies a recommended package of land use strategies and transportation investments for Downtown Stockton. This vision document would be consistent with the State of California Transportation Plan 2050, California Active Transportation Plan, as well as other state and regional plans and policies.

## The Project Will:

- Analyze Downtown Stockton’s existing mobility and land use conditions
- Identify challenges and areas of opportunity
- Recommend a package of infrastructure and programmatic strategies
- Identify an implementation plan with funding strategies and investment priorities
