- Look at what you were doing with this question. It is a perfect example of how out of touch you are. How about making it an affordable place to live? It really doesn't take a whole lot of vision to imagine that possibility. The the number of redundancies and their attendant costs is unsustainable. In the cherry on top? If you were to consolidate local services, we could afford much more capable administrators who could dedicate themselves to making everyone's lives better.

- Your question makes no sense. The Town's identity does not communicate anything. The Towns identity is just that, its identity. Are you asking what I believe the Town's identity will be in the future? If that is your question, I believe it will be much the same. Logos communicate things. The current logo has meaning as it references the Town's historical beginnings.

Making Harbour Park more accessible in terms of fees would be great too. $12 per car is acceptable but $35 for battle boarding is too much of a reach. Marine is already doing a great job with community outreach and it should keep going. The library should offer more programming for families.

- The Town's identity is shaped by its people and the care and attention town government has for its people, not by a logo. The Town should substantively take care of all of its residents, schools, streets, businesses, parks and other community centers, etc. This will foster respect among residents (largely present) and respect for our government, public spaces and the Town will remain a comfortable, safe place to live. The logo, I believe, is irrelevant in all of this.

- Sustainable would be great. But the ToM needs to go beyond Silver status on CSC. How about an entire EV fleet? Sign the Fossil Fuel non-proliferation treaty. It's funny that you suggest "cooperative" it seems the town can be uncooperative with it's neighbors and school district at times. It would be nice if we were more "inclusive" with diverse ethnic communities. VoL is walkable, but the Town is less so. How about "bikeable" if we added more bike lanes?

I understand the new Greek restaurant will have seating for 250 people. where will all those people park? When I moved here Larchmont was the place and Mamk ave was dead. Complete role reversal in the time I have lived here. Maybe this logo change is for Mamaroneck village? where I live its useless.

- Bury the power lines like they do in western Europe. Take a look at the power lines in France. Most of them are buried and engineered to withstand flooding and wind. I feel like it would help the community a great deal to bury the lines in heavily affected areas that are prone to the most flooding first. Then work your way outward to the least affected areas. That way the entire Mamaroneck area could be covered. Of course you would have to ask if other people would want this too. It makes sense
