

## Values and Outcomes of the CBE Science Program

- Use the Alberta Education Science curriculum.
- Foster curiosity, critical thinking skills and problem-solving based on science and technology perspectives.
- Co-construction of knowledge and understanding through the perspective of science.
- Connection with scientific experts.
- Study of the natural world at school and in the community.
- Consistent participation in regular field studies that provide opportunities for problem-solving, knowledge acquisition, and service through a scientific lens.
- Instructional focus on inquiry, experiential learning and integrated project work.
