

TOWN OF NANTUCKET SEWER DEPARTMENT

WASTEWATER MANAGEMENT

SEA STREET PUMP STATION SEWER FORCE MAIN NO.3
SURFSIDE ROAD FULL-DEPTH RECLAMATION AND PAVING

Dear Resident:

The Town is implementing a sewer project that will include the installation of a new sewer force main that will connect the Sea Street Pump Station (SSPS) to the Surfside Wastewater Treatment Facility (SSWTF). The project will also include upgrades to water, sewer, stormwater, and other utilities along the Town-approved sewer force main route.

The next phase of construction includes the full-depth reclamation and paving of Surfside Road between Vesper Lane and First Way, beginning on October 15, 2024. The work will take place between the hours of 8:30 AM and 5:00 PM, Monday through Friday, and is anticipated to take 1-1.5 weeks to complete.

During construction, Surfside Road will be closed to through traffic between Sparks Avenue and First Way. Local detours and roadway shutdowns will be implemented during work hours and the road will be re-opened at the end of each workday. Police detail officers and/or flaggers along with the construction crew will make every effort to accommodate and assist residents in accessing their homes.

We appreciate your understanding and patience as the Town continues to implement this critical and important project.

If you have any questions, please contact the Sewer Department at:
