Give your feedback on the proposed electric vehicle charge points

This consultation is focused on making sure we get the placement of these charge points right. We're particularly interested in practical, location-specific feedback — for example:

Are there any issues with access, parking, or visibility?
Are there obstructions (such as trees, street furniture, or dropped kerbs) that could make installation difficult?
Would installing a charge point at this location create issues for pedestrians, wheelchair users, or other road users?

Please give your feedback on the proposed locations.
