APPENDIX C - POTENTIAL SUDS SCHEME LOCATIONS

ID	Location	CDA	Type of SuDS
1	Lordship Recreation Ground	63	Re-landscaping of existing wetland/open watercourse channels to further enhance/increase flood attenuation capacity within the park.
2	Duckett's Common (Park)	57	SuDS basin to capture runoff from Turnpike Lane and 50% of runoff from Willoughby Road.
3	Chestnut Park	57	Potential for two SuDS basins to attenuate runoff from overland flow paths from Cranleigh Road/Blackboy Lane junction and surcharging manholes south and west of Flamer Park.
4	A10 Verge/Eastern Roundway – Great Cambridge Road to Lordship Lane	63	Collection and removal of 50% runoff on road surface to green spaces in adjacent verges.
5	Paignton Road	57	Collection and removal of 50% runoff from Eastbourne Road and Richmond Road surface
6	Henrietta House Area, St. Ann's Road (Homes for Haringey)	57	Runoff from hardstanding and green space in several common areas is proposed to be restricted to greenfield runoff rates. Provision made within scenario model for SuDS scheme to remove runoff from car park area adjacent to Latimer Road to road verge.
7	Pulford Road	57	SuDS basin in green space to the rear of buildings collecting flows from Remington Road and Pulford Road
8	Victoria Crescent	57	50-100% reduction of runoff from roof areas through downpipe disconnections, runoff from paths and green areas within development reduced to greenfield runoff rates.
9	Tottenham Green Leisure Centre	57	Reduction of runoff from 50% of roof area through downpipe disconnection and runoff from road area directly in front of leisure centre and small grass area in front of the leisure centre reduced to greenfield runoff rates.
10	Broad Lane	57	SuDS basin within green area taking 100% of runoff from Broad Lane and 50% of runoff from Ashmount Road and Talbot Road.
11	Devonshire Hill Lane	57	50% of runoff from road capture by green areas.
12	Edgecot Grove	63	All runoff from paths and impermeable areas in middle of development reduced in greenfield runoff.
13	Crescent Gardens	63	50% of runoff from surrounding roads captured within adjacent green space.
14	Warkworth Lane	63	All runoff from road surface and 50% of roofed areas captured in adjacent green spaces.
15	Stamford House, Stamford Road	63	50% of runoff from roofed areas reduced through downpipe disconnection and runoff removed from surrounding green areas and paths reduced to greenfield runoff rates.
