

The Heights Water Main Improvement Project Phase 2

This multi-phase project will improve the reliability of the City of Tampa's water infrastructure while coordinating construction with the Florida Department of Transportation's (FDOT) planned roadway improvements. As part of Phase 2 of the project, the Tampa Water Department will replace approximately 8,000 linear feet of aging water mains before FDOT begins planned curb-to-curb roadway resurfacing.

What Areas Will Be Impacted?

Work will primarily take place along North Florida Avenue between East Dr. Martin Luther King Jr. Boulevard and East Palm Avenue.

Completing the water main replacements ahead of the roadway resurfacing will help strengthen the reliability of the water system, streamline construction efforts, and help minimize construction impacts. The project is expected to be completed Spring 2028.

Please Note: Construction crews will make every effort to maintain convenient and continuous access to all nearby businesses as work continues.

Project Benefits

Improved Water Pressure

Improved Water Quality

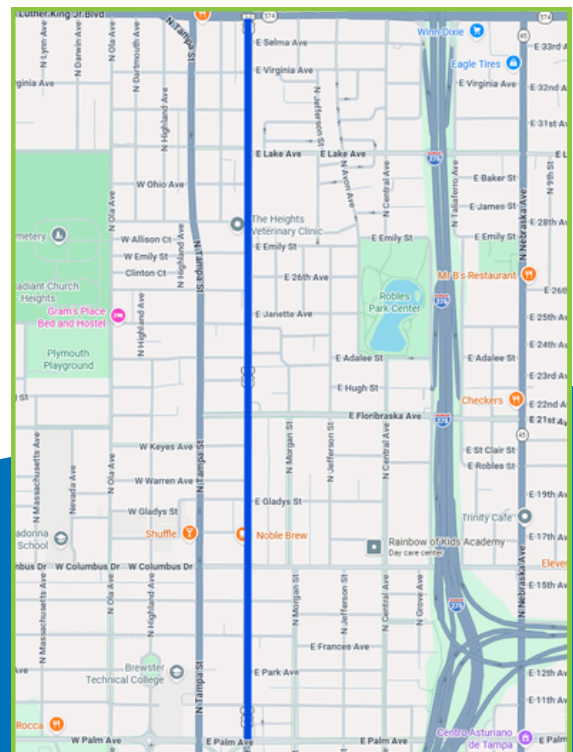

**Lowered Risk of Water
Main Breaks**
